8. EU STRATEGY FOR THE BALTIC SEA REGION
1. INTRODUCTION

This manual is approved by the monitoring committee of the cooperation programme “Interreg V-A — Estonia-Latvia”. It provides an overview of the planning and managing of the projects financed by the Estonia-Latvia programme.

The text of this manual is the main guide to the applicants.¹

The manual provides guidance on the process from the preparation of the idea form and application to implementation, monitoring, reporting and finalisation of the project. The JS updates the manual throughout the programme period, thus use always the version of your call for proposals available on the programme’s website.

You are welcome to study also the cooperation programme “Interreg V-A – Estonia-Latvia” as well as EU legislation that is available at the programme’s website http://www.estlat.eu

¹ PLEASE NOTE THAT THE AUTHORITATIVE SOURCES OF INFORMATION ON THE PROGRAMME IS THE COOPERATION PROGRAMME AND RELEVANT COMMUNITY AND NATIONAL LEGISLATION. IF THERE IS ANY CONFLICT BETWEEN INFORMATION PROVIDED IN THIS MANUAL, AND THE COOPERATION PROGRAMME OR COMMUNITY LEGISLATION, THE LATTER TAKE PRECEDENCE.
2. GENERAL PROGRAMME INFORMATION

2.1. Estonia-Latvia programme

The programme manual is based on the Cooperation Programme “Interreg V-A – Estonia-Latvia” CCI 2014TC16RFCB050, which was approved by the European Commission on 4 December 2015 (decision No. C(2015) 8926) (hereafter referred to as the “programme”). The programme can be downloaded at www.estlat.eu

The programme is implemented under the European territorial cooperation goal of the cohesion policy and it supports cross-border cooperation. The programme carries on the co-operation relationship between Estonia and Latvia, which started during implementation of the Estonia-Latvia-Russia INTERREG IIIA Priority within the Baltic Sea Region INTERREG III B Neighbourhood Programme in 2004 and Estonia-Latvia programme 2007-2013. It is funded by European Regional Development Fund (ERDF), the Republic of Estonia and the Republic of Latvia.

2.2. Vision of the programme

Estonia and Latvia are places with excellent opportunities for people to lead successful and fulfilling lives, among happiest in Europe.

2.3. Mission of the programme

We support ideas that help Estonia and Latvia to grow through neighbourly cooperation.

2.4. Priorities of the programme

The programme has four priorities:

1) Active and attractive business environment;
2) Clean and valued living environment;
3) Better network of harbours;
4) Integrated labour market.

2.5. Eligible territory

The eligible area of the programme includes the following NUTS III regions:

Estonia: Lõuna-Eesti (South Estonia), Lääne-Eesti (West Estonia).

Latvia: Kurzeme, Pierīga, Rīga, Vidzeme.

---

2 EC division according the Territorial Units for Statistics – please see www.ec.europa.eu/eurostat/ramon
The programme area is highlighted on the map:

![Map of programme area](image)

2.6. Programme funding

The programme is financed by the European Regional Development Fund (ERDF) and co-financed by national partners and participants. The total ERDF budget available for commitments to projects during the period 2014 to 2020 amounts to 35 359 237 EUR, which is matched with public and private co-financing. Programme funding availability per priority is published on the programme’s website, at www.estlat.eu.

2.7. Programme management

The management structure of the programme consists of the following institutions:

Managing Authority (MA) is responsible for efficiency and correctness of management and implementation of the programme. The MA also fulfils certifying functions, thus it is responsible for the accuracy of expenditure statements and compliance of the eligible expenditures with Community and national rules. The tasks of MA are carried out by the Estonian Ministry of Finance, Cross-Border Programmes’ Implementation Unit. The MA signs subsidy contracts, verifies that the co-financed products and services are delivered and that the expenditure declared by the projects has actually been incurred and complies with Community and national rules. The MA draws up and submits payment applications for the ERDF funds to the European Commission, receives payments and pays out subsidies to the projects.
Audit Authority (AA) is situated at the Financial Control Department of the Estonian Ministry of Finance, in Audit Unit III. The AA ensures that audits are carried out to verify the effective functioning of the management and control system of the programme, and correctness of the controls carried out on the projects.

Group of Auditors (GoA) has a task to assist the Audit Authority. GoA comprises of the representatives of the AA and of the Internal Audit Department of the Latvian Ministry of Environmental Protection and Regional Development.

The Estonian Ministry of Finance will secure segregation of functions between abovementioned authorities within the ministry’s structure.

Monitoring Committee (MC) is composed of maximum eight members from both Estonia and Latvia. Members of the MC include representatives of the relevant authorities and partners on the national and regional level, including representatives of the socio-economic partners and civil society partners (e.g. environmental partners, non-governmental organisations etc.) from both member states. The MC is responsible for selecting operations, monitoring projects implementation, making changes in this document, and proposing amendments to the Cooperation Programme.

National Responsible Authorities of the programme are the Estonian Ministry of Finance and the Latvian Ministry of the Environmental Protection and Regional Development. These institutions are responsible for implementation of the programme in their countries. National responsible authorities establish coordination mechanisms between European territorial cooperation programmes and structural funds’ programmes in Estonia and Latvia.

Joint Secretariat (JS) is the most important contact point for project applicants, as it provides daily assistance to applicants and project managers during preparation and implementation of projects. The JS is responsible for the daily implementation and monitoring of the programme, assists the MA and MC, and, where appropriate, the AA and the GoA in carrying out their respective duties. The JS is hosted by Enterprise Estonia and located in Tartu. The JS is supported by the information and consultation point in Riga (ICP) located at the State Regional Development Agency.

Financial Control (FC) system in Estonia and Latvia is set up by the member states. FC bodies are responsible for verifying on the basis of partner reports that the co-financed products and services have been delivered, expenditure declared by the beneficiaries has been paid and that it complies with applicable law, the operational programme and the conditions for support of the project. Partner reports are verified according to national conditions and procedures that are described in this document and national FC reporting guidelines.

In addition, in Latvia a national sub-committee (NSC) is formed, which includes representatives from ministries, regions and NGOs. NSC meetings are held in order to create the national position on the relevance of the projects’ topics to the national planning documents and strategies.

2.8. Languages of the programme

The official language of the programme is English, including official correspondence and documents.

Project idea form and application have to be submitted in English. However, technical documentation and document “Justification of investments” can be in English; or in Estonian or Latvian with a short summary in English. Also partner reports and project progress reports have to be submitted in English, but supporting documentation, e.g. invoices, contracts, tender documentation, etc., can be in Estonian or Latvian.

Project consultations are held in Estonian, Latvian or English. Project partners can report all project related translation costs as eligible costs.
3. PROGRAMME SET-UP AND SUPPORTED ACTIVITIES

The programme has four priorities: 1) Active and attractive business environment, 2) Clean and valued living environment, 3) Better network of harbours, and 4) Integrated labour market.

The narrower focus of each priority is defined by three key elements: specific objective(s), result indicator(s) and output indicator(s).

Each priority has at least one specific objective. Each project must choose the specific objective that best matches its intention.

Each specific objective has result indicator(s) with baseline and target values. Result indicators are used for measuring the achievement of specific objectives. Thus, every project must show its contribution to fulfilment of one result indicator’s target value.

Each specific objective has also output indicators with target values. Similarly to result indicators, these are used for measuring the achievement of specific objectives. Each project has to contribute to fulfilment of target value(s) of output indicators.

If you are planning to apply for funding, please test the suitability of your idea against these three elements.

Please refer to Table 1 below for information about the programme’s specific objectives, result and output indicators; result and output indicators’ target values and planned programme funding for each priority.

Surveys for setting the baseline values of the result indicators were carried out in 2014-2015 and they can be downloaded at www.estlat.eu.

Output indicators’ descriptions and examples of supported activities are provided in points 3.1.-3.4.

3.1. PRIORITY 1: Active and attractive business environment

Total ERDF support: 11 368 185 EUR.

Specific objective (SO): 1.1 Increased entrepreneurial cross-border cooperation in the programme area.

This specific objective is targeted at supporting business environment via supportive actions, which encourage people to become self-sustainable, start businesses, develop new ideas and initiatives that increase cooperation and support readiness to cooperate across the border.

Under this specific objective, the programme expects projects that bring together Estonian and Latvian entrepreneurs, business specialists, advisors, professional organisations and people with interest in entrepreneurship. Also, the programme area needs to intensify cooperation between the Estonian and Latvian business support organisations to overcome the lack of adequate and easily-accessed information about the business environment in the neighbouring market.

Cooperation between business support organisations is considered as an important trigger for engaging the above mentioned target groups. Such cooperation development is especially encouraged in the Valga/Valka twin town. As a result, the Member States expect to see an increased number of new companies and self-employed people who are ready to cooperate across the border. It means that new companies (these been younger than two years old) in the programme area have established cooperation ties in areas that are relevant for their business development.

Result indicator: Share of entrepreneurs and new businesses in the region, which are ready for cross-border cooperation.

The baseline value of the result indicator is 53%, which stands for share of entrepreneurs who were ready for cross-border cooperation in 2014. The programme set 59% as the target value for the indicator for year 2022.

Examples of expected activities:

- Activities and supporting systems that facilitate cooperation and information exchange and thereby enhance business activity between entrepreneurs in Estonia and Latvia, including trainings, workshops, consultations and market analyses (including sectoral or value chain related SWOT analyses) to clarify and act on business opportunities mutually available.
- Activities that support businesses in internationalisation and cross-border networking, including, joint participation at trade fairs, contact trips and events organised by or between entrepreneurs from both Member States.
- Activities that promote entrepreneurial spirit in different social target groups and facilitate the establishment of new businesses, which are interested in cross-border cooperation.
- Activities which enable to create long-term relations between entrepreneurs in both Member States, including the creation of joint marketing channels, joint promotional materials, and business events.

Output indicators:

NB! All SO 1.1 projects must fulfil the following output indicators:
1) Participants at project events, except management meetings, or
2) Jointly organized events, except management meetings.
1: Participants at project events, except management meetings.

Programme target: 500 participants.

The output indicator is considered to be fulfilled in the following conditions:

- A person qualifies as a “participant” if he or she takes part in at least one project event in person (virtual participation is not counted). A person may be counted as a participant only one time during the project.
- The format of project events may be chosen by the projects, however it must be in line with the context of the programme and help to achieve the specific objective and result indicator.

2: Jointly organised events, except management meetings.

Programme target: 30 events.

Jointly organised event means that partners from both sides of the border are involved in preparing and designing the content of the event. The format of jointly organised events may be set by the projects, however it must be in line with the context of the programme and help to achieve the specific objective and result indicator.

3: Number of enterprises receiving non-financial support

Programme target: 125 enterprises

“Enterprise” – an SME that is not involved in the project as a project partner, but benefits from project by being involved in project activities (e.g. trainings).

Specific objective: 1.2 More jointly developed products and services in the programme area.

This specific objective is targeted primarily at supporting existing businesses in joint product and service development. It also involves activities for competence building, supporting innovation processes, joint marketing, and joint management training, including the sustainability and competitiveness of SMEs when turning environmental challenges into business opportunities. The programme expects an increased number of enterprises introducing jointly-developed products and services or process improvements and an increased number of enterprises participating in the activities of cross-border business networks. As a result, with the help of networks, knowledge sharing and joint actions, more products and services are developed in cooperation for local markets and for potential promotion in third party markets. The programme area comprises an attractive business environment due to sound knowledge about the neighbouring market and its business support systems.

Result indicator: The share of entrepreneurs carrying out joint product or service development.

The baseline value of the result indicator is 14% which stands for share of entrepreneurs who were carrying out joint product or service development in 2014. The programme set 19% as the target value for the indicator for year 2022.

Examples of expected activities:

- Joint product and service development (including financing the first prototypes and using the services of research development centers or educational institutions in order to test the created products);
- Carrying out systematic and long-term development activities for SMEs (e.g. prototyping seminars, use of science laboratories services);
• Building marketing and sales related competencies, including e-commerce related competencies (e.g. materials; trainings);
• Enhancing cooperation between SMEs, research and educational institutions, and public support structures, supporting innovation processes (e.g. including introducing the circular economy concept\(^3\) into entrepreneurial processes);
• Marketing activities such as market research, joint contact events or participation at trade fairs, development of marketing materials, acquiring access to relevant databases.

Output indicators:

\[\text{NB! All SO 1.2 projects must fulfil at least one of the following output indicators:}\]
1) Joint products and services developed in cooperation, or
2) Joint marketing activities.

1: Joint products and services developed in cooperation.
Programme target: 12 products and services.
At least one SME from Estonia and one SME from Latvia must contribute with their own thematic expertise and specialization to carrying out joint product or service development as project partners.
The programme is not financing the production of goods for sale.

2: Joint marketing activities.
Programme target: 12 activities.
Joint marketing activity – marketing joint products and services developed in cooperation or marketing together Estonian and Latvian products. Joint activities may include:
- Visiting target markets and organising marketing events directed to the target markets;
- Preparatory activities for carrying out joint marketing, e.g. carrying out the research of target markets, including services related to obtaining contact and background information of partners and attributes of the target markets including status, trends, competition and risk analysis;
- Participation at fairs directed to the target markets, etc.

3: Number of enterprises receiving grants.
Programme target: 25 enterprises.
“Enterprise” – an SME that is involved in the project as a project partner and thus receiving financial support.

4: Number of enterprises receiving non-financial support.
Programme target: 80 enterprises.
“Enterprise” – an SME that is not involved in the project as a project partner but benefits from project by being involved in the project activities, e.g. trainings, joint marketing activities.

5: Employment increase in supported enterprises.

\(^3\) Circular economy – an industrial economy, which includes a shift from the fossil fuels to the use of renewable energy that is, by design or intention, restorative and in which material flows are of two types, biological nutrients, designed to re-enter the biosphere safely, and technical nutrients, which are designed to circulate at high quality without entering the biosphere. It requires action at all stages of the life cycle of products: from the extraction of raw materials, through material and product design, production, distribution and consumption of goods, repair, remanufacturing and re-use schemes, to waste management and recycling, but also in organization, society, finance methods and policies. Circular economy systems keep the added value in products for as long as possible and eliminate waste.
Programme target: 60 full time equivalents.

“Enterprise” – an SME. New workplaces are created in SMEs that are involved in the project and receive financial or non-financial support.

Under this specific objective, only the following investments are allowed:

- Investments necessary for joint product or service development carried out by SMEs;
- Investments necessary for joint marketing activities carried out by any of the project partners;
- Equipment necessary for project management.
3.2. PRIORITY 2: Clean and valued living environment

Total ERDF support: 13 645 790 EUR.

Specific objective: 2.1 More diversified and sustainable use of natural and cultural heritage.

This specific objective aims at promoting values and supporting wise use of natural resources and tangible and intangible cultural heritage by developing their potential for tourism and recreational activities. The balance between preserving and developing the existing heritage, including maritime heritage, is a key component for creating advanced services and activities which help to increase their visibility for visitors and raise the common identity and value of local communities.

The target of the programme is to support the creation of 7 (sets of) tourism products or services based on cultural or natural heritage. To achieve this, the programme expects to receive projects that target wider geographical territory and involve larger networks of partners. It is expected that the new tourism products or services will be created based on the already existing sites.

Tourism product is a complete visiting experience, which consists of different tourism services (e.g. accommodation, catering, guide service) that visitor consumes during the travel. Tourism products must be developed following the concept of customer journey. This means that the applicant must consider at least the following elements:

- How do visitors find information about the product?
- How do visitors get there?
- What is the main reason for going there?
- What are the eating and accommodation options nearby?
- What else is there to see and experience?

As a result, improved sites, services and diversified activities that are related to natural or cultural heritage increase the visibility of regions and facilitate the better use of local resources for the benefit of communities. The experience in preserving common heritage, and its intelligent application and promotion grows stronger under cross-border cooperation, allowing the legacy of Estonian and Latvian shared history to be sustained, including the shared nature, coastline and culture.

Result indicator: Number of visitors at cultural and natural heritage sites.

| The baseline value of the result indicator is 3 103 576 visitors at sample of cultural and natural heritage sites in 2013. The programme set 3 786 000 visitors as the target value for the indicator for year 2022. |

Examples of expected activities:

- Jointly developing sustainable and environmentally-friendly tourism products and services based on diverse natural and cultural heritage of the programme area, e.g. tourism routes, joint offers, joint brands, etc. Usually these tourism products include either thematically or regionally linked objects or attractions and related services.
- The improvement of sites that are of natural or cultural heritage, which are integral components of joint tourism products or services.
- Marketing of the created products and services, different types of marketing events and activities: media advertising, participation in fairs, visits etc.
**Output indicators:**

NB! All SO 2.1 projects must fulfil the output indicators “(Sets of) products or services created based on cultural or natural heritage” and “Cross-border networks established or strengthened for managing and promoting the sites”. Fulfilling the output indicator “Improved sites of natural or cultural heritage” is optional, thus a project cannot fulfil only the output indicator “Improved sites of natural or cultural heritage”.

1: Improved natural or cultural heritage sites.

*Programme target: 35 improved sites.*

Natural heritage sites are for example Suur Munamägi, Matsalu Nature Centre, Gutman’s Cave and Venta Waterfall. Cultural heritage sites are for example Kõpu Lighthouse, Palamuse O. Luts’s Parish School Museum, Āraiši Archeological Museum Park and Ēdole Castle.

Investments may not exceed an average 30 000 euros per site in one project while the maximum amount per single site in the project may not exceed 50 000 euros. These are total amounts i.e. they include the ERDF support and co-financing.

2: (Sets of) products or services that are created based on cultural or natural heritage.

*Programme target: 7 (sets of) products or services.*

(Sets of) products or services must be either jointly developed and/or offered.

3: Cross-border networks that are established or which are strengthened in order to manage and promote the sites.

*Programme target: 7 cross-border networks.*

A cross-border network has interested parties on both sides of the Estonian-Latvian border that have complementary interests and regular contacts. Cross-border networks are for maintaining and sustaining the jointly developed and/or offered products or services.

Under this specific objective, only the following investments are allowed:

- Investments for improving sites of natural or cultural heritage;
- Investments necessary for joint marketing activities of the products or services created based on cultural or natural heritage;
- Equipment necessary for project management.

**Specific objective: 2.2 Increased awareness of energy saving, sorting waste and re-use, and the more efficient management of common water resources.**

This specific objective targets the challenges and opportunities that are related to the efficient use of resources and sustainable daily behaviour. Promoting solutions for recycling, energy efficiency and improved cooperation in joint water resource management are subjects to be achieved under this specific objective. The programme seeks to achieve two results:

Firstly, the programme aims at increasing the awareness and change people’s habits towards more environmentally friendly behaviour in their everyday life concerning energy saving, waste sorting and re-use. Public awareness of efficient resource managing still needs to be raised, since there is a lack of good practice, insufficient support and information. A wider use of existing technologies or the implementation of new technologies is supported.
Investments that support the awareness raising may not exceed an average 30 000 euros per site in one project while the maximum amount per single site in the project may not exceed 50 000 euros. These are total amounts i.e. they include the ERDF support and co-financing.

Secondly, the programme aims at increasing cooperation intensity between institutions that are involved in the management of common water bodies and coastal areas i.e. Gauja/Koiva river basin, Salaca/Salatsi river basin and marine and coastal areas of the programme territory. Thus, the programme supports only those projects that involve in their partnership at least one Estonian and one Latvian institution listed in the footnote. Investments that support the joint water or coastal areas management initiatives may not exceed an average 30 000 euros per site in one project while the maximum amount per single site in the project may not exceed 50 000 euros. These are total amounts i.e. they include the ERDF support and co-financing.

**Result indicators:**

1. **Awareness of people in terms of resource efficiency.**

   The baseline value of the result indicator is 43% which shows the share of respondents being very familiar with energy saving, sorting waste and re-use in 2014. The programme set 53% as the target value for the indicator for year 2022.

2. **Cooperation intensity between institutions** in the management of water bodies and coastal areas.

   The baseline value of the result indicator is 36%, which stands for share of institutions who carried out regular cooperation in 2014, including regular information exchange, regular meetings and experience exchange trips or joint trainings. The programme set 59% as the target value for the indicator for year 2022.

**Examples of expected activities:**

- Activities that increase the awareness about importance of energy saving, waste sorting and re-use including public campaigns, hands-on workshops, information tools etc.
- Improving efficient use and protection of joint water resources (Gauja/Koiva river basin, Salaca/Salatsi river basin and marine and coastal areas of the programme territory) via intensified cooperation between the relevant institutions.
- Actions aimed at coordinated cross-border reaction to environmental accidents in the Gulf of Riga, ensuring efficient support to pollution prevention.

---

4 Estonian institutions: Environmental Board of Hiiu-Lääne-Saare region; Environmental Board of Põlva, Valga, Võru region; Hiiu County Government; Lääne County Government; Ministry of Agriculture; Ministry of Economic Affairs and Communications; Ministry of the Environment; MTÜ Eesti Väikesadamate Arenduskeskus/Estonian Small Harbours’ Development Centre NGO; MTÜ Liivi Lahe Kalanduskogu /Association of Fisheries of Gulf of Liivi; Pärnu County Government; Police and Border Guard Board; Saare County Government.

Latvian institutions: Association of Latvia’s Coastal Local Authorities (member of LALRG); Kurzeme Planning Region; Latvian Environment, Geology and Meteorology Centre; Latvian Institute of Aquatic Ecology Administration; Maritime Administration of Latvia; Ministry of Agriculture - field of fishery; Ministry of Environmental Protection and Regional Development; Riga Planning Region; State Border Guard; State Environmental Service.

In case of projects regarding Gauja/Koiva river basin, the partnership must include Vidzeme Planning Region, or municipality/municipalities of Vidzeme Planning Region from Gauja/Koiva river basin, or organisations founded by municipality/municipalities from Gauja/Koiva river basin in Vidzeme Planning Region.

In case of projects regarding Salaca/Salatsi river basin, the partnership must include Vidzeme Planning Region or Riga Planning Region, or municipality/municipalities from Salaca/Salatsi river basin in Vidzeme Planning Region or Riga Planning Region, or organisations founded by municipality/municipalities from Salaca/Salatsi river basin in Vidzeme municipality.
Output indicators:

NB! All projects under SO 2.2 topic “Increased awareness of energy saving, sorting waste and re-use” must fulfil the output indicator “Public campaigns that are targeted at environmentally-friendlier behaviour”. Fulfilling other output indicators of SO 2.2 is optional.

All projects under SO 2.2 topic “More efficient management of common water resources” must fulfil the output indicator “Joint management initiatives for water or coastal areas”. Fulfilling other output indicators of SO 2.2 is optional.

1: Participants at project events, except management meetings.

Programme target: 450 participants.

The output indicator is considered to be fulfilled in the following conditions:

- A person qualifies as a „participant“, if he or she takes part in at least one project event in person (virtual participation is not counted). A person may be counted as a participant only one time during the project.
- The format of project events may be chosen by the projects, however it must be in line with the context of the programme and help to achieve the specific objective and result indicator.

2: Public campaigns that are targeted at environmentally-friendlier behaviour.

Programme target: 6 public campaigns.

Public campaigns are purposive attempts to inform or influence certain behaviours of an audience within a specified time period using an organised set of communication activities (e.g. audio-visual materials, events, publications, etc.) that are distributed through various channels.

3: Joint management initiatives for water or coastal areas.

Programme target: 5 management initiatives.

The output indicator is considered to be fulfilled in case of implementing any type of joint initiative that concerns joint management of Gauja/Koiva river basin, Salaca/Salatsi river basin or marine and coastal areas of the programme territory.

4: Small-scale investments.

Programme target: 40 investments.

Investments that support public awareness raising on energy saving, sorting of waste or re-use, or that support joint water or coastal areas management initiatives may not exceed an average 30 000 euros per site in one project while the maximum amount per single site in the project may not exceed 50 000 euros. These are total amounts i.e. they include the ERDF support and co-financing.

Under this specific objective, only the following investments are allowed:

1) Investments for supporting awareness raising or management of common water bodies and coastal areas;
2) Equipment necessary for project management.

Specific objective 2.3: More integrated Valga-Valka central urban area.

This specific objective aims at supporting the revitalisation of the cross-border joint urban area on the border of Estonia and Latvia in the centre of Valga-Valka twin town. It turns the currently neglected wasteland around the previous border zone into a lively and attractive urban space that makes maximum use of the unique area with interesting environmental features (stream running along the border, different altitudes). These improvements should have a direct impact on improving interaction
between communities and integrating the twin town, which has been developed as two separate entities so far.

**Result indicator:** The share of inhabitants of Valga and Valka recognising Valga-Valka as a joint town.

| The baseline value of the result indicator in 2015 was 21%, which stands for share of inhabitants of Valga and Valka recognising Valga-Valka as a joint town. The programme set 28% as the target value for the indicator for year 2022. |

**Examples of expected activities:**

- Creating a multifunctional cross-border central square in Valga and Valka on the border of Estonia and Latvia including an area for open-air markets and festive events, playgrounds, innovative lighting systems, original urban space furniture, etc.
- Creating a pedestrian street passing the new central square and linking churches in town centres of Valga and Valka.
- Renovating an old cross-border bridge across a small stream (Konnaoja) running along the border of Estonia and Latvia. Cleaning the area along the banks of Konnaoja and joining this revitalized green area with actual greenway along the Pedeli River.
- Restoring houses around the newly established cross-border central square to attract entrepreneurs to the area.

**Output indicator:**

1: Improved and revitalised cross-border joint urban area.

*Programme target: 18,000 m².*
3.3. PRIORITY 3: Better network of harbours

This priority is not open during the calls for proposals.

Under this specific objective, the programme will finance through a direct award procedure\(^5\) pre-defined project(s) that support creation of a network of small harbours on the western coast of Latvia and in the Gulf of Riga for providing services of similar quality.

\(^5\) Direct award procedure – the MC can approve pre-defined project(s) without opening a call of proposals in order to fulfill certain output indicators of the programme.
3.4. PRIORITY 4: Integrated labour market

**Total ERDF support:** 1 011 182 EUR.

**Specific objective:** 4.1 Improved conditions for accessing jobs across the border.

This specific objective aims to promote employment possibilities, accelerate the completion of vacancies and improve the availability of information for the job seekers and employers across the border.

The programme expects to receive projects, which help to provide people on both sides of the border with information, improved qualification and supporting activities to activate labour mobility across the border and expand the work opportunities on the other side of the border.

As a result, the improved and promoted employment options (e.g. databases, re-training activities) and integrated services support labour commuting and business activities. People and entrepreneurs on both sides of the border have better access to relevant information and supporting activities that help to accelerate the filling of vacancies, have improved opportunities to find necessary specialists; and cross-border regions and local communities are more prepared to contribute into the labour market and labour movement issues on the national and cross-border levels.

**Result indicator:** Work commuters crossing the border.

*The baseline value of the result indicator is 2753 persons, which stands for work commuters crossing the border in 2013. The programme set 3100 persons crossing the border on regular bases as the target value for the indicator for year 2022.*

**Examples of expected activities:**
- Adjusting databases of Estonian job seekers and job offers for the Latvian market and vice versa.
- Carrying out life-long learning and re-training activities.
- Developing the (language) skills that are necessary for cross-border jobs.
- Distant/smart work.
- Local and/or regional initiatives (e.g. info services, fairs, and similar events that serve to promote cross-border employment).
- Raising the capacity of local and regional bodies, both public and private, that provide labour market and public employment services.
- Internships across the border.

**Output indicators:**

1: New and/or improved services for job seekers and/or job providers.

*Programme target: 2 services.*

New and/or improved service must create or improve cross-border job opportunities or improves access to employment across the border.

2: Participants in cross-border mobility initiatives.

*Programme target: 160 participants.*

The output indicator is considered to be fulfilled in the following conditions:

- A person qualifies as a „participant“, if he or she takes part in at least one project event in person (virtual participation is not counted). A person may be counted as a participant only one time during the project.
- The format of project events may be chosen by the projects, however it must be in line with the context of the programme and help to achieve the specific objective and result indicator.

3.5. Horizontal principles

The principles of sustainable development, equal opportunities and non-discrimination as well as equality between men and women will be assessed in accordance with the nature of the project.

**Sustainable development**

Sustainable development will be taken into account as a horizontal principle throughout the whole programme implementation. Projects with a direct negative impact on the environment and sustainable development will not be funded.

Priority 2 “Clean and valued living environment”, specific objective 2.2 focuses directly to resource efficiency and environmentally friendly behaviour. Projects funded under this specific objective will have to clearly demonstrate a direct positive impact on sustainable development of their regions. In addition, projects will be reviewed from the viewpoint of impact on climate change.

The programme encourages the application of principles of sustainability to all aspects related to project management. The lead partners are asked to consider the most sustainable and nature-friendly use of all resources that are planned for implementing projects. This applies to the dissemination materials, print-outs, meetings, modes of communication, etc. While the travels are an essential part of cross-border activities, beneficiaries of the programme are encouraged to choose the most sustainable travel mode.

**Equal opportunities and non-discrimination**

As a general approach, all projects will be requested to integrate these horizontal issues in their activities or, at least, to consider the project’s influence on these.

Projects with a direct negative impact on equal opportunities and non-discrimination will not be approved.

**Equality between men and women**

In addition to the general principle of non-discrimination, the programme will pay attention to the equality between men and women. Projects with a negative impact on equality between men and women will not be approved.
4. PROJECT MAIN FEATURES

4.1. Project size and co-financing rates

The maximum grant size depends on the programme’s specific objective that the project falls under:

<table>
<thead>
<tr>
<th>Specific Objective of the Programme</th>
<th>Maximum Grant Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Increased international entrepreneurial activity in the programme area.</td>
<td>500 000 EUR</td>
</tr>
<tr>
<td>1.2 More jointly developed products and services in the Programme area</td>
<td>500 000 EUR for those projects that fulfil only the output indicator “Joint marketing activities”</td>
</tr>
<tr>
<td>2.1 More diversified and sustainable use of natural and cultural heritage</td>
<td>1 MEUR</td>
</tr>
<tr>
<td>2.2 Increased awareness and more efficient management of common natural resources.</td>
<td>500 000 EUR</td>
</tr>
<tr>
<td>2.3. More integrated Valga-Valka central urban area</td>
<td>3 MEUR</td>
</tr>
<tr>
<td>3.1 Improved network of small harbours with good services.</td>
<td>Budget of priority 3</td>
</tr>
<tr>
<td>4.1 Improved conditions for accessing jobs across the border.</td>
<td>500 000 EUR</td>
</tr>
</tbody>
</table>

The minimum grant size is not fixed.

Co-financing from the programme can be up to 85% of the total eligible costs for all types of partners. In case of state aid, i.e. aid that fulfils all criteria of the Article 107(1) of the Treaty on the Functioning of the European Union, the co-financing from the programme can be between 50% and 85% of the total eligible costs, depending on the type of activities supported.

Information about state aid is provided in point 4.7. and in annex 1.

---

6 State aid is a form of state intervention used to promote a certain economic activity. It implies that certain economic sectors or activities are treated more favourably than others and thus distort competition because it discriminates between companies that receive assistance and others that do not.

The system of state aid is built around the principle that state aid is incompatible with the common market, nevertheless accepts that the granting of such aid can be justified in exceptional circumstances.

The legal status of a project partner, who is involved in an economic activity and operates in a market in which there is trade between EU Member States, is not relevant in the context of state aid.

The project partner is taken as an enterprise; because any entity, regardless of its legal form – a company, any other person engaged in economic or professional activities, local governments, legal persons in public law etc. – is always treated as an enterprise in state aid situation. State aid in the sense of Article 107 (1) has four characteristics:

i) It is granted by State or through State resources;
ii) It favours certain undertakings or production of certain goods;
iii) It distorts or threatens to distort competition;
iv) It affects trade between EU Member States.
4.2. Project duration
The maximum project duration is 36 months\(^7\). It is recommended to reserve up to 2 months in the end of the project for compiling reports. Other project activities should be finalised by that time.

4.3. Basic project and partnership requirements
Projects are requested to fulfil four main principles of joint projects:

1) The projects have to be developed, written and planned jointly by the partners from both sides of the border;

2) The project has to follow the principles of joint implementation opposed to two parallel actions on either side of the border in order to achieve mutual benefits from the co-operation;

3) Project team carrying out the project has to involve members from both Estonia and Latvia;

4) All partners have to contribute to the project financially or in-kind (see chapter 5.6.), which is confirmed by a co-financing statement attached to the application form.

Projects must involve at least one Estonian and one Latvian partner, who are legally registered in the programme area and whose activities in the project are for the benefit of the programme area. The monitoring committee may in duly justified cases approve projects with Estonian or Latvian partners from outside the programme area in case their participation is necessary for the successful implementation of the project and their activities are targeted to the benefit of the programme area.

In case of private enterprises, the owners of the companies in Estonia and Latvia cannot be the same, nor can they be owned by their close relatives and/or family members. Once the project is approved, all project partners have to sign partnership agreement (see point 6.3. Contracting).

4.4. Lead partner
Each project has to appoint a lead partner (LP). LP submits the application and is responsible for the whole project. If the project is selected for funding, LP signs a subsidy contract with the MA, and takes full financial and legal responsibility for the project. During project implementation, only LP may request payments based on the subsidy contract, and has the responsibility to forward the funds to other project partners.

LP is responsible for timely and correct reporting, ensuring that the EU and national legislation concerning financial management and controls (financial control), public procurement, information and publicity and state aid is respected and observed by the project partners.

LP is also responsible for the division of tasks among the partners involved in the project and for ensuring that these tasks are fulfilled. The tasks and deadlines have to be set in the partnership agreement signed by LP and project partners.

In addition, it is LP’s task to ensure proper communication with and among the partners, keep everybody informed about the project status and plans, and implement the project according to the approved application form.

LP has to appoint or sub-contract a project manager, who is qualified to handle the thematic co-ordination of the project activities, be able to act as a driving force in the partnership and mobilise the partners in order to achieve the objectives laid down in the application. In order to ensure effective

\(^7\) In duly justified cases, the monitoring committee may select for funding projects with longer duration.
and efficient communication with the programme management structures, the project manager has to be fluent in English.

In addition, LP has to appoint or sub-contract financial manager, who is responsible for the accounts, financial reporting, and internal handling of the ERDF funds and national co-financing. Financial manager has to work in close contact with the project manager and the partners in order to enable efficient overall financial management of the project. Financial manager has to work according to the programme rules, and national laws.

The tasks of project manager and financial manager may be carried out by the same person.

LP can be:

(1) National, regional or local public authority;

(2) Public equivalent body\(^8\), which means any legal body:

(a) Established under public or private law for the specific purpose of meeting needs in the general interest\(^9\), not having an industrial or commercial character, and

(b) Having legal personality, and

(c) * Either financed, for the most part, by the state, or regional or local authorities, or other bodies governed by public law,

* or subject to management supervision by those bodies,

* or having an administrative, managerial or supervisory board, more than half of whose members are appointed by the state, regional or local authorities or by other bodies governed by public law.

(3) SME under specific objectives 1.1 and 1.2;

(4) Private enterprise under specific objectives 2.1, 2.2, 2.3, 3.1 and 4.1;

(5) Non-governmental organisation;

(6) Sole proprietor\(^10\).

4.5. Project partners

Project partners can be all the bodies fulfilling the criteria listed in the chapter 4.4. or any other non-profit oriented legal bodies. The JS checks the eligibility of partners based on documents submitted by the partners and information in relevant national registries.

Each project partner must nominate a coordinator, who is the contact point between the project partner and the project manager, and a book-keeper, who is responsible for project book-keeping in the project partner organisation.

The tasks of partner coordinator and bookkeeper may be carried out by the same person.

---

\(^{8}\) Here, the “public equivalent body” means a “body governed by public law” as defined in Article 2, point 1 (4) of Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on public procurement.

\(^{9}\) “Needs in the general interest” are defined as needs which are satisfied otherwise than by the availability of goods and services in the marketplace and which, for reasons associated with the general interest, the State or Local Government chooses to provide itself or over which it wishes to retain a decisive influence. Legal bodies, which have objectively taken responsibility for, and have since satisfied such needs, could also be considered fulfilling the above criterion.

\(^{10}\) In Latvia - individuālais komersants. In Estonia - füüsilist isikust ettevõtjad.
4.6. Team-building for project partners

We encourage project partners to plan team-building activities for the first reporting period to “break the ice” and build trust among partners.

Costs related to team-building activities are eligible and can be planned under relevant budget lines.

4.7. State aid

The programme aims at financing private sector partners and activities of all types of legal entities that have an effect on market in specific fields – for example the development of services and products or harbours. Thus, there can be situations where a project partner receives support from the programme and gets an advantage over its competitors. Depending on the size of the received grant, it may be considered either state aid or de minimis aid.

What is state aid?

State aid is defined as an advantage in any form, when it is granted to a selection of legal entities by public authorities. Situations where general measures are open to all legal entities – e.g. general taxation measures or employment legislation – are not considered as state aid situations.

**NB! Legal acts generally prohibit state aid unless it is justified by reasons of general economic development. Where ever a state aid situation appears, meaning project partner gets an advantage over its competitors due to support from the programme, the programme authorities must either inform the European Commission about it or ask for its permission to grant this type of aid. Therefore, please consult and co-operate with the JS on state aid issues!**

In order to better understand, whether your project or some of the project activities may contain state aid, please follow the scheme below:
Are you applying for/have received a grant by EU/state or through EU/state resources?
**Estonia-Latvia Programme is funded by ERDF that is EU resource.**

**YES**

Does the grant give you an advantage on a selective basis, for example to specific companies or industry sectors, or to companies located in specific regions?
**Estonia-Latvia Programme may target both specific sectors and regions.**

**YES or UNCLEAR**

Does the grant you receive distort competition or have a potential to distort competition?
**Will you be able to take a larger share of the market than you would have had without the support of Estonia-Latvia Programme?**

**YES or UNCLEAR**

Does it affect trade between Member States?

**YES or UNCLEAR**

Please consult the JS, to find out whether the grant you are applying for or receiving is state aid or de minimis aid. The JS will inform you about further proceedings and requirements related to the situation.

Please notice that you have to check your activities, because similarly to other programmes that are funded by EU or State resources, this programme does not support

- aid to export-related activities towards third countries or member states. NB! The costs of participating in trade fairs, or of studies or consultancy services needed for the launch of a new or existing product on a new market in another EU Member State or a third country are eligible, as they do not normally constitute aid to export-related activities;
- aid contingent upon the use of domestic over imported goods.

**Legal basis for granting state aid and de minimis aid rules.**
State aid will be granted by the programme in accordance with the following legal acts:

- Commission Regulation (EU) No 651/2014, so-called General Block Exemption Regulation (hereafter referred to as the GBER);
Programme manual of the Estonia-Latvia programme 2014-2020  
1st call for proposals, November 2017

- Commission Regulation (EU) No 702/2014, so-called Block Exemption Regulation applicable to the agriculture and forestry sector and for rural areas (hereafter referred to as the ABER);

The programme also grants *de minimis* aid under all priority axes, which due to its small volume does not distort competition within the European Union, in accordance with the following legal acts:
- Commission Regulation (EU) No 1407/2013 on *de minimis* aid;
- Commission Regulation (EU) No 1408/2013 on *de minimis* aid in the agriculture sector;

Indicative overview about the use of state aid and *de minimis* aid in the programme

<table>
<thead>
<tr>
<th>Specific objective</th>
<th>State aid types</th>
<th>State aid in agricultural and forestry sectors</th>
<th>State aid for fishery and aquaculture sectors</th>
<th><em>De minimis</em> aid</th>
</tr>
</thead>
<tbody>

<td>2.1 More diversified and sustainable use of natural and cultural heritage.</td>
<td><strong>GBER, Article 53:</strong> Aid for culture and heritage conservation, 70-80% of eligible costs; on the basis of analysis up to 85%. <strong>GBER, Article 20:</strong> aid for SMEs’ cooperation costs</td>
<td><strong>ABER, Articles 14: 85% of eligible costs, 17: 70% of eligible costs.</strong></td>
<td><strong>FIBER, Articles 14, 15, 22, 24, 25, 50-85% of eligible costs.</strong></td>
<td></td>
</tr>
</tbody>
</table>
2.2 Increased awareness of energy saving, sorting waste and re-use, and the more efficient management of common water resources.

- **GBER Article 20**: aid for SMEs' co-operation costs linked to ETC projects. 50% of the eligible costs.
- **GBER Article 31**: training aid: 70%.
- **ABER, Articles 14, 17**: 85% of eligible costs.
- **FIBER, Articles 13-15, 22, 24-26, 28-32, 34, 42, 50-85% of eligible costs.**

3.1 An improved network of small harbours with good levels of service.

- **GBER, Article 55**: Aid for sport and multi-functional recreational infrastructures. For aid not exceeding EUR 1 million per undertaking, 80% of eligible costs, or on the basis of analysis up to 85%.
- **Networking**: **GBER Article 20**: aid for SMEs' cooperation costs linked to ETC projects 50%.
- **Preparation costs**: de minimis aid or different articles of GBER.
- **ABER is not applicable.**
- **FIBER is not applicable.**

4.1 Improved conditions for accessing jobs across the border.

- **GBER Article 31**: training aid: 70%.
- **ABER, Article 21**: 85% of eligible costs.
- **FIBER, Articles 16, 33**: 50-85% of eligible costs.

---

How to take state aid into account during different phases of project preparation and implementation?

**During the development of project idea**

When generating a project idea, project partners are invited to contact the JS to receive assistance and information about the possible state aid or de minimis aid situation related to the project idea.

**During the development of project application form**

During the development of application forms all project activities will be more concretely defined and therefore it is better to identify how they fall under state aid or de minimis aid regulations.

Please notice that falling under state aid or de minimis aid rules has an effect on project activities, co-financing rates and amounts, but also on the starting date of project and its activities. It is the responsibility of project partners to contact and continue co-operation with the JS in order to ensure the eligibility of the activities, taking into account relevant state aid or de minimis aid rules, to identify
possible incompatibilities of project activities with state aid rules and to get guidance how to implement the project in line with the regulations.

NB! All Latvian project partners who apply for *de minimis* aid are asked to submit *de minimis* declarations to accompany the application form, to ensure that *de minimis* thresholds allow the respective partner to apply for funding.

Information about *de minimis* aid received by Estonian partners is checked by the JS from the national state aid and *de minimis* aid registry.

**Project evaluation and selection**

The JS will assess project application forms with regard to state aid. When approving a project for co-financing, the MC may decide to ask the project participants to exclude or change certain activities to ensure that the grant is in line with state aid or *de minimis* aid rules.

**Signing subsidy contract**

The date of signing the subsidy contract is the date of granting the aid.

**Project implementation period**

In case a project plans activities with participation of companies (both SMEs and large)\(^{11}\) (e.g. trainings, mentoring, participation in trade fairs, etc.), the companies may be regarded as third parties receiving *de minimis* aid (so called "indirect *de minimis* aid"). The indirect *de minimis* aid is granted by the Estonian Ministry of Finance.

The LP must ensure PP(s) are aware that participants of the activity are granted indirect *de minimis* aid.

The partners (incl. LP) must take the following actions to ensure that the participants (companies) are aware of the situation and the *de minimis aid* is calculated correctly:

1. When advertising the activity, partners must inform the potential participants, that the *de minimis* will be granted. Also, the amount (of the training, mentoring session etc.) per participant\(^*\) must be indicated and that only those with sufficient leftover of *de minimis* can take part.

   \(^*\) When calculating the amount of the activity, project partners must take into account only costs directly related to the activity (not staff costs), e.g. external expertise services, cost of room rent, catering etc.

2. The JS provides the template for the participants’ confirmation. On this sheet, when attending the event, the participants confirm with the signature, that they are not an undertaking in difficulties, and that they have sufficient leftover of the *de minimis*. In addition, participating Latvian companies provide the *de minimis* declarations (scanned and uploaded to the e-Monitoring System (hereinafter referred to as 'eMS'), originals submitted to the JS eventually). Checking the Estonian companies in the state e-register for the leftover by partners at this point is optional.

   If the participating company does not have sufficient leftover of the *de minimis* aid, it must pay the participation costs (calculated share of the activity).

3. The JS will check the documents related to granting of indirect *de minimis* together with the progress report. For Estonian companies the granted amount will be inserted into the e-

\(^{11}\) Fulfilment of project output indicators must take into account only SME-s, as stipulated in the programme manual Chapter 3.
registry by Enterprise Estonia. For the Latvian companies the MA will issue the decision on the
form provided as annex 2 to the Rules of the Cabinet of Ministers No. 740 of 2 December 2014:
https://likumi.lv/ta/id/271005-ide-minimisi-atbalsta-uzskaites-un-pieskirsanas-kartiba-un-
uzskaites-veidlapu-paraugi.

4. In case of project partners, whose entire support from the programme is de minimis and who
give the indirect aid to the participants, the received amount will be corrected in the Estonian
e-register after confirming the progress report. Corrected decisions shall be issued to the
Latvian SMEs (for project partners the SC shall be changed).

Project partners of public sector that receive state aid or de minimis aid above ERDF contribution rate
to the respective partner are state aid or de minimis aid donors for themselves, unless their co-
financing comes from other economic activities or loans. If project partners of public sector are
granting state aid or de minimis aid for themselves then respective project partner is responsible for
documenting and reporting granted aid in accordance with national legislation.

During project implementation period all the partners receiving state aid or de minimis aid are invited
to turn to JS with all the questions they have about the application of activities or rules related to state
aid or de minimis aid.

All project partners are controlled by FC to verify that the project is implemented in line with applicable
rules and regulations, including state aid and de minimis aid rules. The project may be audited by the
AA or responsible authorities at the EU level. During these audits the observance of state aid rules will
be checked.

Period after project implementation
Where a partner of a project has received state aid, all project partners are obliged to retain for audit
purposes all official files, documents and data about the project at least 10 years from the date on
which the last aid was granted under the scheme.

Project partners can find out the exact date for keeping records in the subsidy contract between the
MA and lead partner.

More information about state aid is provided in annex 1.

NB! In case of questions about state aid, please contact the JS.

4.8. Conflict of interests

The LP and project partners must undertake all necessary precautions to avoid conflicts of interest and
must inform the JS without delay of any situation constituting or likely to lead to any such conflict.
Conflict of interest situation is a situation that has the potential to undermine the impartiality of a
person because of the possibility of a clash between the person's self-interest and professional interest
or public interest.

There is a conflict of interests where the impartial and objective exercise of the functions of any person
involved in the project is compromised for reasons involving family, emotional life, political or national
affinity, economic interest or any other shared interest with another person. The personal interests of
the representative of the LP/project partner must not influence the implementation of the project.

Transactions between project partners are not allowed. Transaction with project partner means that
within one project, which is implemented for example by project partner A and project partner B, a
representative of the project partner A makes transaction with the representative of project partner B.

Conflict of interest also refers to situations in which:

- a person whose direct or indirect personal interests undermine its independence and impartiality in the preparation or organization of the procurement (incl. public procurement);
- a person whose direct or indirect personal interests undermine its independence and impartiality and influence the outcome of the procurement (incl. public procurement).
5. PROJECT BUDGET

5.1. Eligibility of expenditure

Only costs related to the project are eligible costs. The first costs may occur at the earliest on the day after the selection of the project by the monitoring committee. Preparation costs, as described in section 5.4., are an exception to this rule. Please be aware that if your project is approved with certain conditions then making any expenditure before the MA verifies the fulfilment of the conditions is at your own risk.

Expenditure shall be eligible for a contribution from the ERDF if it has been incurred and paid by a project partner during the eligibility period of the project. The last payments must be made by the end date of the project.

As a general principle, costs that are included into partner report must be incurred during the reporting period, but can be paid after the end of the reporting period but not later than the date of the submission of the partner report to the financial control body. Partner can insert into partner report costs that have been incurred before particular reporting period, if these costs have not been included to the previous partner reports and if these costs have been paid out by the time of the submission of the report to financial control body.

The costs have to be incurred in relation to project activities taking place in the programme area. The costs, which have incurred in relation to project activities outside the programme area, are eligible only in exceptional cases, if these are vital to the success of the project as a whole. As a rule, project activities taking place outside the programme area must be specified in the approved application form.

The costs must be reasonable i.e. not above the market average or usual prices. The funds must be used in transparent and economical way.

Specific rules on eligibility of expenditure have been stipulated in Commission Delegated Regulation (EU) No 481/2014 of 4 March 2014 supplementing Regulation (EU) No 1299/2013 of the European Parliament and of the Council with regard to specific rules on eligibility of expenditure for cooperation programmes, as regards staff costs, office and administrative costs, travel and accommodation costs, external expertise and services costs and equipment expenditure.

Also, the participating member states in the monitoring committee may establish additional rules on eligibility of expenditure for the cooperation programme as a whole. For matters not covered by eligibility rules laid down in, or on the basis of, Articles 65 to 71 of Regulation (EU) No 1303/2013, Regulation (EU) No 1301/2013, in the Commission Delegated Regulation (EU) No 481/2014 or in rules established jointly by the participating member states in the monitoring committee, the national rules of the member state in which the expenditure is incurred shall apply.

The eligibility rules apply for the project partners and also for the programme bodies using technical assistance funding.

---

12 In accordance with Article 20 of the Regulation (EU) No 1299/2013 of the European Parliament and of the Council of 17 December 2013 on specific provisions for the support from the European Regional Development Fund to the European territorial cooperation goal.

13 Travelling in Estonia and Latvia outside the programme territory (costs related to budget line “Travel and accommodation costs”) does not have to be explained in the application form in case it is necessary for:
   1) Meeting project partners, who are located outside the programme area;
   2) Meeting the programme institutions in Tallinn;
   3) Transporting people and/or materials directly related to project;
   4) Participating at the events organised by the Estonia-Latvia programme.
   5) Travelling in Estonia and Latvia outside the programme territory to events, which are not foreseen in the application form, but have a clear link with the activities of the project and are for the benefit of the project (e.g. thematic conferences and workshops), is in general acceptable. However, partners must consult the Joint Secretariat before such trips, to avoid problems during processing of partner and progress reports.
5.2. **Ineligible expenditure**

The following expenditure is considered ineligible expenditure for co-financing from the programme’s funds:

- Any costs paid outside the eligible period of the project, except preparation costs, as approved by the monitoring committee;
- Fines, financial penalties and expenditure on legal disputes and litigation;
- Costs of gifts, except those not exceeding 50 euros per gift where related to promotion, communication, publicity or information;
- Costs related to fluctuation of foreign exchange rate;
- Interest on debt;
- Purchase of land not built on or land built on in the amount exceeding 10% of the total eligible expenditure of the project;
- Recoverable VAT;
- Charges for national financial transactions;
- Consultant fees or other service costs between partners for services and work carried out within the project;
- Costs related to subcontracting project partners or employees of partner organisations, who already work for the project based on an employment contract;
- Daily travels of project staff from home to office and back;
- Expenditure that is already supported by a European or other international or national grant.

5.3. **Budget table and description of the budget lines**

The project budget is divided between 6 budget lines, two to four work packages and reporting periods with duration of four months.

The budget table in the application form describes the budget of the whole project. In addition, the partners must fill in a more detailed indicative budget table, which shows each partner’s budget division between budget lines and work packages.

Each partner’s project expenditure must be separated in partner’s bookkeeping system.

Before designing the project budget project partners should also study the Estonian and Latvian financial control guidelines. The guidelines can be found at www.estlat.eu.

5.3.1. **Staff Costs**

*Definition*

Expenditure on costs of staff members employed by the partner organisation, who are formally engaged to work on the project:

- full-time
- part-time
  - part-time with a fixed percentage of time dedicated to the project per month
  - part-time with a flexible number of hours worked on the project per month
- contracted on an hourly basis

“Staff costs” includes staff costs of employees in line with the employment/work contract, and costs of natural persons working for the partner organisation under a contract other than an employment/work contract and receiving salary payments as a form of remuneration. When salary
payments are not used for remuneration of natural persons, they are funded from the costs under external expertise and services.

Note: both the employment/work contract and an appointment decision/contract of natural persons working for the partner organisation and receiving salary payments are hereinafter referred to as ‘employment document’.

**NB!** Information about procurement rules is provided in point 5.5. Price offers and procurement. This is relevant in case of signing contracts with natural persons working for the partner organisation under a contract other than an employment/work contract and receiving salary payments as a form of remuneration.

**General principles**

- Staff costs must relate to activities which the partner organisation would not carry out if the project was not undertaken.
- Overheads and any other office and administration costs cannot be included under this budget line.
- Daily allowances and any other travel and accommodation costs cannot be included under this budget line.
- In case the staff member is working part-time for the project and part-time for other tasks in the partner organisation, the actual salary rate must be used, when calculating his/her costs in the project budget. Different hourly rates in the frame of the same employment contract must be avoided.
- Staff member, who is working for the project or the programme and remunerated from staff costs, cannot conclude any service contracts that are financed in the frames of the same project or programme.

The programme reimburses staff costs only on the basis of real costs:

- Staff costs cover real costs paid out based on a payslip or a document of equivalent probative value.
- The following costs are eligible components of staff costs:
  a. Salary payments fixed in the employment/work contract, an appointment decision (in the case of natural persons working for the partner organisation under a contract other than an employment/work contact), or by law.
  b. Any other costs directly linked to the salary payments, incurred and paid by the employer, such as employment taxes and social security including pensions or holiday payments as long as they are fixed in the employment document and they are in accordance with the legislation and standard practices in the country and/or organisation.
    Organisation standard practices shall refer to all staff of the organisation and no special rules can be made for project employees.
- The salary payments must relate to responsibilities specified in a job description of the individual staff member.
- Costs of social security including pensions are only eligible, if they are not recoverable by the employer.
- Taxable benefits linked to salary payments are eligible as long as they are in line with the employment policy of the partner organisation, e.g. lunch vouchers, bonus payments,
relocation benefits.\textsuperscript{14} They must be directly linked to the salary payments and figure on the payslip.

- Holidays as resulting from normal employer’s obligations are eligible. The cost forms part of the gross employment cost.
- Overtime is eligible, provided it is in conformity with the national legislation and the employment policy of the partner organisation, and it is actually paid to the staff member.
- Staff costs must be calculated individually for each staff member.

\textit{Calculation of staff costs and audit trail}

Depending on the assignment (full-time, part-time, contracted on an hourly basis) to work on the project, staff costs of each individual are calculated as follows:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-time</td>
<td>An individual dedicates 100% of his/her working time to the project.</td>
</tr>
<tr>
<td></td>
<td>Staff costs = total of the gross employment cost</td>
</tr>
<tr>
<td></td>
<td>\textit{Audit trail}</td>
</tr>
<tr>
<td></td>

</tr>
</tbody>
</table>

\textsuperscript{14} Extra bonuses or changes to salaries due to running of an EU project should be evaluated against sound financial management principles (if they are justified by e.g. special qualifications, changes to the task description, etc.).
### 5.3.2. Office and administrative expenditure

**Definition**

Expenditure on office and administration costs. They cover operating and administrative expenses of the partner organisation that support delivery of project activities.
General principles

- No cost item can be taken into account twice, i.e. no double funding is permissible.
- Purchase of office equipment, IT hardware and software, and furniture and fittings cannot be included under this budget line; the cost must be reported as equipment expenditure. This does not include IT system support of an administrative nature; the cost falls under the office and administration budget line.
- The programme uses a flat rate for calculating and reporting office and administrative expenditure. The calculation is done automatically in the application form and partner/progress report forms.

Eligible costs under the office and administration budget line are calculated as a flat rate of 15\% of eligible direct staff costs.\(^{15}\) In case there are no staff costs, office and administration costs will not appear in the budget. An all-inclusive list of cost categories covered by the flat rate is defined below. These cost items cannot be reported under any other budget line.

List of eligible costs:

- Office rent;
- Insurance and taxes related to the buildings where the staff is located and to the equipment of the office (e.g. fire, theft insurances);
- Utilities (e.g. electricity, heating, water);
- Office supplies;
- General accounting provided inside the partner organisation;
- Archives;
- Maintenance, cleaning and repairs;
- Security;
- IT systems (operating/administrative IT services of general nature that support delivery of the project. This includes maintenance costs of IT systems, e.g. costs related to the maintenance of a computer used by the project manager to administrate the project) and license fees for the use of software needed for the project, in case the software is used for administrative purposes of the project;
- Goods assimilated to office equipment (i.e. equipment is used for administrative purposes), e.g. toner for a printer;
- Communication (e.g. telephone, fax, internet, postal services, business cards);
- Bank charges for opening and administering the account or accounts where the implementation of an operation requires a separate account to be opened;
- Charges for transnational financial transactions.

The flat rate covers all office and administration costs, i.e. there is no distinction between direct and indirect costs.

Audit trail

---

\(^{15}\) The only exception to calculating office and administration expenditure as flat rate, are the costs funded from technical assistance of the programme, which are on a real cost basis.
By applying the 15% flat rate, partners do not need to document that the expenditure on office and administration costs has been incurred and paid, or that the flat rate corresponds to the reality.

Please note that in case eligible direct staff costs are deducted, this also causes the deduction of office and administrative expenditure, because as a flat rate they cannot be on a higher level than 15% of the eligible direct staff costs.

### 5.3.3. Travel and accommodation costs

#### Definition

Expenditure on travel and accommodation costs that relate to delivery of the project. Only travel costs (e.g. tickets, travel and car insurance, fuel, car mileage, parking fees, car rent), accommodation costs (incl. city tax, voucher for the use of Wi-Fi in a hotel) and daily allowances can be included under this budget line.

#### General principles

- Travel and accommodation costs must clearly link to the project and be essential for effective delivery of the project activities.

  Travel and accommodation costs can be covered only for persons who are directly related to project activities.

- The travel and accommodation expenses of external experts and service providers fall under external expertise and services costs listed in point 5.3.4.

- Direct payment by a staff member of the partner organisation must be supported by a proof of reimbursement from the employer.

  Daily allowances can be paid to persons, who are working in partner organisations based on employment contracts or public service act (e.g. civil servants).

  In accordance with the respective national legislation, daily allowances may be paid also to third parties i.e. persons who are not working in partner organisations based on employment contracts or public service act.

  Daily travels of project staff from home to office and back are not eligible project costs.

- The principle of sound financial management should apply to the choice of transport and accommodation. In line with the result-oriented policy approach, effectiveness should be the leading principle. In the second instance, cost-efficiency should be ensured, taking into account the entire cost of the mission (travel cost, staff costs related to the travel, etc.).

#### Budget line specific rules

- Travel and accommodation costs must be justified by activities carried out within the project, e.g. participation in project meetings, project site visits, meetings with the programme bodies, seminars, conferences.

- Costs of travel and accommodation related to activities outside the programme area are only eligible, if those activities have been included in the approved application form; except for travelling in Estonia and Latvia outside the programme territory in case it is necessary for

  a) Meeting project partners, who are located outside the programme area;

  b) Meeting the programme institutions in Tallinn;

  c) Transporting people and/or materials directly related to project;

  d) Participating at the events organised by the Estonia-Latvia programme.
Travelling in Estonia and Latvia outside the programme territory to events, which are not foreseen in the application form, but have a clear link with the activities of the project and are for the benefit of the project (e.g. thematic conferences and workshops), is in general acceptable. However, partners must consult the Joint Secretariat before such trips, to avoid problems during processing of partner and progress reports.

- Maximum daily rates for hotel and daily allowance subsistence should be respected, in accordance with the national legislation. In duly justified cases, accommodation costs above the maximum rates may be accepted.

- Travel and accommodation cost should be properly documented in line with the national legislation or internal policy of the partner organisation. In very exceptional cases national rules concerning missing/lost documents may be accepted.

**Audit trail**

The following main documents must be available for control purposes:

1. Agenda or similar document of the meeting/seminar/conference.
2. Paid invoices (e.g. hotel bills, travel tickets).
3. Daily allowance claims.
4. Proof of payment.
5. Travel reports, route sheets, and other documents as required by national legislation.

**5.3.4. External expertise and services costs**

**Definition**

Expenditure for the financing of external expertise and services provided by a public or private body or a natural person outside of the partner organisation. “External expertise and services” covers costs paid on the basis of contracts or written agreements and against invoices or requests for reimbursement to external experts and service providers that are acquired to carry out certain tasks or activities, linked to the delivery of the project.

**General principles**

- The work by external experts and service providers must be linked to the activities in the project application.

- Each partner organisation is responsible for ensuring that EU and national public procurement rules are respected and that all contracts comply with the basic principles of transparency, non-discrimination and equal treatment as defined in the EC Treaty and the Commission Interpretative Communication on the Community law applicable to contract awards below the EU thresholds\(^1\).

- No sub-contracting between project partners is allowed.

NB! Information about procurement rules is provided in point 5.5. Price offers and procurement.

**Budget line specific rules**

- All types of costs related to external experts (e.g. travel and accommodation expenses for external experts) must be foreseen in the service contract and recorded under this budget line.

---

\(^1\) [http://ec.europa.eu/internal_market/publicprocurement/docs/keydocs/communication_en.pdf](http://ec.europa.eu/internal_market/publicprocurement/docs/keydocs/communication_en.pdf)
• All costs of external expertise and services that are linked to an investment in infrastructure should be included under this budget line, e.g. feasibility studies etc.

• Costs of external expertise related to activities outside the programme area are only eligible, if those activities have been included in the approved application form.

• Advance payments to the external service providers can be reported in the progress report only after the partial or full delivery of the purchased services/goods, with the exception of a maximum of 1/3 advance payments according to signed contracts with suppliers and contractors.

• Catering must be foreseen in the event agenda otherwise catering costs are ineligible. Alcoholic beverages are eligible only together with a meal and in moderation, forming up to 1/4 of the respective invoice.

**Audit trail**

The following main documents must be available for control purposes:

1. Evidence of the selection process, in line with national procurement rules or the EU public procurement rules depending on the amount contracted.

2. A contract or a written agreement laying down the services to be provided with a clear reference to the project. For experts paid on the basis of a daily fee, the daily rate together with the number of days contracted and the total amount of the contract must be provided. Any changes to the contract must comply with the public procurement rules and must be documented.

3. An invoice or a request for reimbursement providing all relevant information in line with the applicable accountancy rules.

4. Outputs of the work of external experts or service deliverables.

5. Proof of payment.

**List of eligible costs**

Expenditure for external expertise and services category of costs are limited to the following:

• Studies or surveys (e.g. evaluations, strategies, concept notes, design plans, handbooks);

• Training;

• Translations;

• IT systems and website development, modifications and updates, including license fee for the use of software needed for the project; **NB!** Where the software is used for administrative purposes of the project, the cost falls under budget line ‘Office and administration’;

• Promotion, communication, publicity or information linked to the project;

• Project management and financial management;

• Services related to the organisation and implementation of events or meetings (including rent, catering or interpretation);

• Participation in events (e.g. registration fees);

• Legal consultancy and notarial services, technical and financial expertise, other consultancy and accountancy services;

• Intellectual property rights;
- Travel and accommodation for external experts, speakers, chairpersons of meetings and service providers, only in case the cost is paid by the external experts;
- Other specific expertise and services needed for the project or for the programme.

5.3.5. Equipment

**Definition**

Expenditure for the financing of equipment purchased, rented or leased by a partner, necessary to achieve objectives of the project. This includes costs of equipment already in possession by the partner organisation and used to carry out project activities. In the case of investment activities, “equipment” covers costs of fixed investments in equipment, and costs of equipment that forms part of an investment in infrastructure.\(^{17}\)

**General principles**

- Costs of equipment are eligible if they have been approved by the programme.
- Costs of equipment are eligible if no other EU funds have contributed towards financing of the same expenditure item, i.e. no double funding is permissible.
- All costs are subject to applicable public procurement rules and each partner organisation is responsible for ensuring that these rules have been respected.

**NB!** Information about procurement rules is provided in point 5.5. Price offers and procurement.

**Budget line specific rules**

- Full purchase cost of equipment is eligible, if the equipment is in line with aims of the programme and crucial for the achievement of the project’s objective, and incurred and paid within the eligible period.
- Depreciation of the equipment purchased from project cannot be placed in the project budget. For equipment that has been purchased before the project approval, depreciation costs are eligible only when the following conditions are fulfilled:
  a) the amount of the expenditure is duly justified by supporting documents having equivalent probative value to invoices for eligible costs where reimbursed in the form referred to in point (a) of the first subparagraph of Article 67(1) Common Provisions Regulation (EU) No 1303/2013\(^{18}\);
  b) the costs relate exclusively to the period of support for the operation;
  c) public grants have not contributed towards the acquisition of the depreciated assets.
- Equipment cannot be purchased, rented or leased from other project partners.
- Purchase cost of second-hand equipment is eligible, provided the equipment has the technical characteristics necessary for the operation and complies with applicable norms and standards, its price does not exceed the generally accepted price on the market and no other assistance has been received for it from the ESI Funds.

\(^{17}\) Compared to equipment that supports delivery of project activities, fixed investments in equipment and investments in infrastructure refer to outputs of the project, which remain in use by the partners and/or target groups after completion of the project.

\(^{18}\)Article 67.1 (a):
1. Grants and repayable assistance may take any of the following forms:
   (a) reimbursement of eligible costs actually incurred and paid, together with, where applicable, contributions in kind and depreciation.
Audit trail

The following main documents must be available for control purposes:

1. Evidence of the procurement process (announcement, selection, award) in line with the national procurement rules or the EU procurement rules depending on the amount of the contract.
2. Invoice (or a supporting document having equivalent probative value to invoices, in the case of depreciation) providing all relevant information in line with the applicable accountancy rules.
3. Calculation scheme of depreciation.
4. Proof of payment.
5. Act of delivery and receipt.

List of eligible costs

Expenditure for equipment is limited to the following:

- Office equipment;
- IT hardware and software;
- Furniture and fittings;
- Laboratory equipment;
- Machines and instruments;
- Tools or devices;
- Maintenance and repairs of equipment needed for the project;

Goods assimilated to equipment needed for the project, e.g. fuel to run the equipment. NB!

Where the good is assimilated to office equipment (i.e. equipment is used for administrative purposes), the cost falls under ‘Office and administration’ (e.g. toner for a printer);

- Other goods and materials needed for the project (not necessarily assimilated to equipment), e.g. chemicals, seeds, animals;
- Vehicles;
- Exhibition equipment, e.g. exhibition stands, pop-up displays;
- Other specific equipment needed for the project.

5.3.6. Infrastructure and works

Definition

Expenditure for the financing of infrastructure and construction works. “Infrastructure and works” covers costs related to investments in infrastructure that do not fall into the scope of other budget lines. This includes costs for site preparation, delivery, handling, installation, renovation, and purchase of land, when applicable.

General principles

- Costs of infrastructure and construction works are eligible if they have been approved by the programme.
- Costs of infrastructure and construction works are eligible if no other EU funds have contributed towards financing of the same expenditure item, i.e. no double funding is permissible.

- All costs are subject to applicable public procurement rules and each partner organisation is responsible for ensuring that these rules have been respected.

- All investments in infrastructure must comply with the applicable EU and programme information and publicity rules.

**NB!** Information about procurement rules is provided in point 5.5. *Price offers and procurement*.

**Budget line specific rules**

- Full costs of infrastructure and construction works that form part of the project are eligible, i.e. no depreciation is eligible.

- Documents specifying the ownership of land and/or buildings where the works will be carried out must be provided.

- Purchase of land cannot exceed 10% of the total eligible expenditure of the project. In the case of derelict sites and sites formerly in industrial use which comprise buildings, the purchase price cannot exceed 15% of the total eligible expenditure. In exceptional and duly justified cases, a higher percentage may be permitted for projects concerning environmental conservation, provided it has been approved by the programme (ref: Article 69.3(b) Common Provisions Regulation (EU) No 1303/2013).

- All compulsory requirements set by the EU and national legislation related to the respective investment in infrastructure must be fulfilled (e.g. feasibility studies, environmental impact assessments, building permission, etc.).

**Audit trail**

The following main documents must be available for control purposes:

1. Evidence of the procurement process (announcement, selection, award) in line with the national procurement rules or the EU procurement rules depending on the amount of the contract.

2. Contract laying down the works/infrastructure to be provided, with clear reference to the project and the programme. For contracts based on a daily fee, such fee together with the number of days contracted and the total amount of the contract must be provided.

3. Invoice providing all relevant information in line with the applicable accountancy rules.

4. Proof of payment.

5. Act of delivery and receipt.

**5.4. Preparation costs**

Preparation costs are eligible only for projects approved by the managing authority.

The programme covers project preparation costs as a lump sum of 5000 euros. This includes all costs that partners have during the project preparation. This sum must be inserted in the lead partner’s budget and it will be declared in LP’s partner report without any calculations and cost documents.

In addition, the programme covers real costs related to the preparation of technical documentation and other necessary studies, which are required by national laws. Real costs are covered only for those
infrastructure objects to be constructed/investments to be made within the project, except for
detailed planning documents. Real costs can be up to 10% of the relevant construction costs in the
project. Such preparation costs have to follow the rules applicable to the budget line “External
expertise and services”. Project partners may not buy services from each other. Real costs are eligible
if the payments in question are made no earlier than 24 months before the MC selection date and
before the day of the MC selection.

5.5. Price offers and procurement

5.5.1. Price offers and public procurement in Latvia

Latvian project partners have to follow Latvian national public procurement rules. Persons who are not
subjects of the Public Procurement Law and the Law on the Procurement of Public Service Providers
should act according to the Rules of the Cabinet of Ministers No. 104 of 28 February 2017. Please
notice that financial control body may ask for explanations in case of purchases below the thresholds
provided by Latvian national public procurement rules.

5.5.2. Price offers and public procurement in Estonia

All Estonian project partners are obliged to take competitive price offers to purchases from 5000 euros
(not including VAT). This requirement does not apply to purchases that are regarded as exemptions or
simplified procedures by Estonian national public procurement rules. Please notice that financial
control body may ask for explanations also in case of purchases below 5000 euros (not including VAT).

As regards public procurement, project partners have to follow articles 57 and 26 of 2014-2020
Structural Assistance Act and Public Procurement Act19:

All Estonian project partners, who are contracting authorities of public sector in accordance with the
Public Procurement Act, must follow the procedure provided for in the Public Procurement Act.
Pursuant to the Public Procurement Act, contracting authority of public sector is:

1) the state or state authority;
2) local authority, local authority agencies and association of local authorities;
3) another legal person governed by public law and agency of legal persons governed by public
law;
4) foundation where the state is one of the founders or where more than half of the founders are
contracting authorities specified in clauses 2) or 3) of this subsection or where more than half
of the members of the supervisory board are appointed by the contracting authorities
specified in clauses 1) to 3) of this subsection;
5) legal person governed by private law and who is mainly financed by or where more than half
of the members of the management body or supervisory body are appointed by or where the
management is otherwise jointly or severally controlled by the contracting authorities
specified in clauses 1–3 of this subsection (including form the European Economic Area
countries) and which has been founded for the purpose of performing, as its primary or
ancillary activity, functions in the public interests and has no industrial or commercial character.

Project partners, who are not contracting authorities of public sector in accordance with the Public
Procurement Act, may award a contract for the purchase of supplies, services, public works etc. that
are above the threshold of a simplified procurement procedure, as stipulated in the Public
Procurement Act, only when all the following conditions are fulfilled:

19 Link to Public Procurement Act: https://www.riigiteataja.ee/akt/101072017001
1) The purchase is carried out, following the procedure and principles of the simplified procurement procedure (lihtnang), as described in the Public Procurement Act;

2) The general principles of public procurement, as stipulated in the Public Procurement Act, must be followed;

3) The purchase must be carried out electronically in the e-procurement environment* of the Procurement Register, where the project partner must identify itself as a grant recipient, who is not a contracting authority of public sector for the purposes of the Public Procurement Act.

*If it is necessary to invite tenderers to participate in the procurement from abroad:

- The project partner who carries out the procurement fills in the fields in the e-procurement environment in Estonian. The information in the fields must be translated into English and added either to the same fields or attached as a separate file to the procurement in the e-procurement environment.

- It is recommended that the project partner who carries out the procurement sends to potential tenderers by email a link to the procurement in the e-procurement environment and to the instructions in English on the use of the e-procurement environment;

- Tenderers from abroad can register themselves as users in the procurement environment and submit their tender through the register, but they will not sign their tender in the e-procurement environment. The tenderer may submit all the documentation in English.

The partner who carries out the procurement in e-procurement environment must add financial controllers and auditors to the list of procurement team members in the e-procurement environment (financial controllers’ role: viewer; auditors’ role: evaluator): when partner report is checked by financial controller or audited by auditor, the respective programme authority (FC body or Audit Authority) will send an email to the project partner, informs about the person who will carry out the check or audit and requests adding this person to the procurement team.

One of the key factors for deciding whether a public body is a contracting authority, is the amount of public financing that body receives. Being “mainly financed” by public financing refers to public financing over 50%, in which case that body is to be regarded as a contracting authority of public sector.

A legal body may be financed from various sources and those funds are provided for a variety of purposes and on various grounds. It is therefore necessary to determine the real nature of each of the forms of financing and the percentage of public financing, for which account must be taken of all of its income, including the income that results from a commercial activity.

Such calculation must be carried out annually on the basis of the figures available at the beginning of the budgetary year, even if they are only provisional. The legal body is expected to retain the status of either being or not being a contracting authority of public sector for 12 months from the beginning of each budgetary year.

More information about defining contracting authority of public sector can be found from the Public Procurement Act and from the portal of e-Procurement Estonia under section Frequently Asked Questions. Please notice that it is the responsibility of each Estonian project partner, governed by the private law, to assess in the beginning of each budgetary year, whether it is a contracting authority of public sector or not.

5.6. In-kind contribution

Only unpaid voluntary work can be regarded as in-kind contribution. Each project partner can report the value of its in-kind contribution only up to the amount of its co-financing to the project. Minimum

---

20 Link to the section Frequently Asked Questions: https://riigihanked.riik.ee/lr1/web/guest/korduma-kiippuvad-kusimused
annual official national gross salary level must be followed when calculating the value of in-kind contribution.

The costs of unpaid voluntary work must be included under the budget line staff costs. Employee working on the basis of employment contract cannot do similar work as unpaid voluntary work for the project.

**Audit trail:**

A contract or a written agreement laying down the tasks related to the project.

Time sheets, providing information on the number of hours spent per month on the project and on the tasks performed for the project. Proof of results or activities (for example photos).
6. APPLICATION AND SELECTION PROCEDURE

6.1. Pre-submission consultations

We strongly encourage the applicants to receive individual consultation on the potential project idea. Although such consultations are not compulsory, they allow to test the compliance of the idea to the requirements of the programme.

Individual consultations are carried out in the premises of the Joint Secretariat (JS) in Tartu and information and consultation point in Riga (ICP). Consultations are available by prior booking and after the submission of a pre-filled project idea form by email to the JS. The project idea form does not have to be signed for consultations. The template for project idea form is available at www.estlat.eu.

We are also ready to provide advice by phone or email. Our contact information is available on the programme’s website at www.estlat.eu.

6.2. Application procedure

The programme uses mainly open calls that might be thematically targeted.

A call for applications is opened for predefined time period. More detailed information on the opening and closing times (date and time) is available on the programme website.

Application procedure consists of:

1) Submission of the project idea form followed by the JS feedback;
2) Submission of full application.

The projects are obliged to pass through both procedures in order to be assessed and to qualify for receiving financing from the programme.

In addition to open calls also other options, if deemed necessary by the monitoring committee (MC), can be applied as well. For example, direct award procedure for fulfilling certain output indicators of the programme that can be provided only by a specific partnership.

6.2.1. Submission of the project idea form

All applicants must submit the project idea form. This form gives information on the objective, activities and relevance of the project to the specific objectives, result and output indicators of the programme together with information on the partnership and budget.

The project idea form must be filled in English.

The project idea form must be signed by the lead partner. All other project partners must sign a letter of intent, which is annex 1 to the project idea form.

In addition, the Latvian partners (including the lead partners) must sign a declaration to confirm that 1) the (lead) partner has repaid any EU or national support that had to be refunded by the deadline, and 2) the (lead) partner or his legal representative has not been validly sentenced or penalized (see point 6.2.1.1., technical eligibility criteria nr. 6 and 7). The declaration is annex 2 to the project idea form.

The lead partner must submit these documents electronically for assessment. It is recommended to submit the documents with a digital signature. If it is not possible, the documents must be signed, scanned and sent electronically over email. The scanned documents must be submitted on paper after passing technical eligibility and loose quality check. The date and signature must reflect the final changes in these documents.

The project idea form and letter of intent are available via the programme’s website at www.estlat.eu.
At a request, applicants are required to certify that they are in compliance with the requirements of the programme and submit additional data and documents.

6.2.1.1. Assessment of the project idea

1) Technical eligibility and loose quality check of project idea

At first, project ideas are checked against the technical eligibility criteria – i.e. if they have fulfilled the technical requirements of the programme. During the technical eligibility check necessary verifications are carried out in co-ordination with the relevant national authorities.

The JS will check the existence of the letters of intent. If they are missing, the lead partner is given 3 working days to submit them.

The JS will then continue checking the project idea form against the other technical eligibility criteria and in parallel performs the loose quality check of the project idea. The aim of the loose quality check is to minimise unclear issues related to the content of the project idea form. The JS will check if the project idea forms are clearly written and respond to the questions listed in the idea form. The depth and level of detail of the questions depends on the quality of the project idea form. It means that those project ideas which have not been thoroughly prepared and leave a number of questions unanswered or unclear, receive more general questions, which do not point out every shortcoming, but rather summarise the nature of typical shortcomings.

In case the project idea form does not meet the technical eligibility criteria and/or includes unclear issues related to the content, the JS will send a request by email to the LP to complement the project idea form. The email will be sent to the LP’s contact person on the email address provided in the project idea form. The level of detail of the questions related to the content of the project idea depends on the level of detail of the project idea form.

The LP has to ensure the fulfilment of the technical criteria and submit an updated project idea form by the deadline given by the JS.

After updating and re-submitting the project idea form, the JS will finalise the technical eligibility and loose quality check.

Project idea forms must fulfil all technical eligibility criteria in order to pass on to the quality assessment. This means that missing information/documents must be submitted to the JS within the given deadline. If a project does not fulfil the technical eligibility criteria, the MA will take a decision to reject the project idea. The JS shall send the decision to the LP. The MC will be informed about such project ideas.

Once the project idea form fulfils all technical eligibility criteria, the JS will make it available to the MC.

Technical eligibility criteria:

1. Project involves at least one Estonian and one Latvian partner, who are legally registered in the programme area and whose activities in the project are for the benefit of the programme area.\(^\text{21}\)

2. Lead partner is eligible (type, territory, officially registered by the project idea submission date of the given call).

3. Project partners are eligible (type, territory, officially registered by the project idea submission date of the given call).

\(^\text{21}\) In duly justified cases, the monitoring committee may select for funding projects with Estonian or Latvian partners from outside the programme area in case their participation is necessary for the successful implementation of the project.
4. Project partners are not bankrupt (there is no ongoing bankruptcy proceeding or no bankruptcy decision).

5. Project partners are not in liquidation or in compulsory dissolution.

6. Project partners have repaid any EU or national support that had to be refunded by the deadline. The Latvian partners have submitted respective declaration to confirm that.\(^{22}\)

7. The applicant or his legal representative has not been validly sentenced or penalized\(^{23}\). The Latvian partners have submitted respective declaration to confirm that.\(^{24}\)

8. **Specific question** for projects under specific objective 1.2 output ‘Joint products and services developed in cooperation’:
   - The project partnership involves at least one Estonian SME and one Latvian SME.

9. **Specific question** for projects under specific objective 2.2 output ‘Joint water or coastal areas management initiatives’:
   - The project partnership involves at least one Estonian and one Latvian partner listed in the footnote.\(^{25}\)

10. The planned activities help to fulfil the target value of at least one, or, in some cases two, output indicators depending on the requirements of the particular specific objective explained in chapter 3 of the programme manual.

11. Project budget is within the set financial limits.\(^{26}\)

12. Project duration is within the set limits.\(^{27}\)

13. The dated and signed letter of intent is provided by each partner (except for the lead partner).

14. Information is provided under each point of the project idea form.

15. The project idea form is duly dated and signed.

---

\(^{22}\) Information about the Estonian partners is checked by the JS from relevant national registries.

\(^{23}\) Fraud (Estonian Penal Code § 209 Fraud and § 210 Benefit fraud, Latvian Criminal Law section 177);

Provision of employment for alien staying in either Latvia/or Estonia without legal basis (Estonian Penal Code § 260; Latvian Administrative Violations Code section 189 (prim), as well as the Criminal Law - section 280);

Economic activities without activity license and prohibited economic activities (Estonian Penal Code § 372; Latvian Criminal Law sections 207 and 208);

Violation of prohibition on business or prohibition to work in particular profession or position (Estonian Penal Code § 373; Latvian Criminal Law section 208 and section 296).

Information about Estonian partners is checked by the JS from relevant national registries.

\(^{24}\) Estonian institutions: Environmental Board of Hiiu-Lääne-Saare region; Environmental Board of Põlva, Valga, Võru region; Hiiu County Government; Lääne County Government; Ministry of Agriculture; Ministry of Economic Affairs and Communications; Ministry of the Environment; MTÜ Eesti Väikesadamate Arenduskeskus/Estonian Small Harbours' Development Centre NGO; MTÜ Liivi Lahe Kalanduskogu/Association of Fisheries of Gulf of Liivi; Pärnu County Government; Police and Border Guard Board; Saare County Government.

Latvian institutions: Association of Latvia’s Coastal Local Authorities (member of LALRG); Kurzeme Planning Region; Latvian Environment, Geology and Meteorology Centre; Latvian Institute of Aquatic Ecology; Maritime Administration of Latvia; Ministry of Agriculture - field of fishery; Ministry of Environmental Protection and Regional Development; Riga Planning Region; State Border Guard; State Environmental Service.

In case of projects regarding Gauja/Koiva river basin, the partnership must include Vidzeme Planning Region, or municipality/municipalities of Vidzeme Planning Region from Gauja/Koiva river basin, or organisations founded by municipality/municipalities from Gauja/Koiva river basin in Vidzeme Planning Region. In case of projects regarding Salaca/Salatsi river basin, the partnership must include Vidzeme Planning Region or Riga Planning Region, or municipality/municipalities from Salaca/Salatsi river basin in Vidzeme Planning Region or Riga Planning Region, or organisations founded by municipality/municipalities from Salaca/Salatsi river basin in Vidzeme municipality.

\(^{26}\) In exceptional cases, when the monitoring committee finds it justified, it may select for funding projects with bigger budget than the set limits.

\(^{27}\) In exceptional cases, when the monitoring committee finds it justified, it may select for funding projects with longer duration than the set limits.
Project ideas that fulfil the technical eligibility criteria are subject to quality assessment.

1) **Quality assessment of project ideas**

The quality assessment of project ideas is carried out by the JS following the 4-eye principle i.e. at least two members of the JS staff will assess each project idea. In addition, assistance from thematic experts will be used as necessary. The quality assessment, which is based on the quality criteria, results in assessment report to be submitted to the monitoring committee for feedback.

The quality assessment of project ideas includes assessment of 4 criteria. Each criterion gives a certain weight to the total scoring and the weights are indicated in the 1st column in the table below. For each criterion indicative questions are listed, which are used for assessment. Indicative questions are listed in the order of importance.

Assessment result (total scoring of a project) is presented as a percentage. The assessors use the following thresholds for grouping the projects:

1. Project ideas receiving total scoring at least 73% are recommended to submit a full application during the same call for proposals.
2. Project ideas receiving total scoring less than 73% are recommended not to submit a full application.

Each criterion must be given a score on a 5-point scale, where:

- “5”: **Excellent**: the project fulfils the conditions of a given criterion on an excellent level and provided information is sufficient, clear and coherent for assessing the criterion;
- “4”: **Good**: the project in general fulfils a given criterion and/or provided information includes certain shortcomings;
- “3”: **Satisfactory**: the project only partly fulfils a given criterion and/or important aspects of the given criterion have not been explained in sufficient clarity or detail;
- “2”: **Weak**: the project has serious shortcomings in fulfilling a given criterion and/or provided information is of low quality;
- “1”: **Unsatisfactory**: the project does not fulfil a given criterion and/or information required is missing, making it impossible to assess the criterion.

Scoring of each criterion must be justified and explained. In case a project idea receives “1” for any of the criterion, the project idea is automatically recommended not to submit a full application.

**Quality assessment criteria for project ideas:**

<table>
<thead>
<tr>
<th>WEIGHT OF THE CRITERIA</th>
<th>ASSESSMENT CRITERIA</th>
<th>INDICATIVE QUESTIONS</th>
</tr>
</thead>
</table>
| 25%                    | Change or added value from cross-border cooperation | 1) Is the cross-border cooperation essential for solving the problems and achieving the project objective(s)? Does the cross-border cooperation provide an added value for project partners?  
2) Has the project clear effect and mutual benefits on both sides of the border? |
| 45% | Relevance of the project idea to the chosen specific objective | 1) Does the project idea match the chosen specific objective?  
2) What is the quality of the planned project outputs in the light of descriptions of programme output indicators in the programme manual? In case of projects under specific objective 2.1 also geographic coverage is assessed.  
3) How logical and clear is the link between the planned activities and their influence to fulfilment of result indicator(s) target value? |
| 20% | Relevance of the planned budget | 1) What is project’s contribution to fulfilment of programme output indicator(s) compared to the planned budget?  
2) Is the planned budget reasonable in comparison with the planned activities?  
3) Is the budget balanced between the Estonian and Latvian partners? |
| 10% | Relevance of the partnership | 1) Are the partners relevant for implementing the described activities? |

### 6.2.1.2. Provision of JS recommendation on project ideas

After completing the technical eligibility check and quality assessment, the JS submits its assessment report to the monitoring committee (MC). The MC may give its feedback within 3 weeks from the date of receiving the JS assessment report. The MC has the right to invite applicants to present their idea at its meeting.

In general, the applicant will receive the recommendation within 9 weeks after deadline for submitting project ideas. The concrete time period depends on the number of project ideas submitted in the given call for proposals.

The JS may give two types of recommendations, including possible MC recommendations:

1) You are recommended to submit a full application during the same call for proposals. The recommendation may include conditions for further development of the project idea;

2) You are not recommended to submit a full application. The recommendation includes the shortcomings of the project idea.

### 6.2.2. Submission of the project application

All applicants who have submitted the project idea form and received feedback, may submit a full application. However, those applicants who were recommended not to submit a full application are unlikely to receive monitoring committee’s positive funding decision on their application.

All the necessary documents must first be submitted electronically through the e-Monitoring system for technical eligibility and loose quality check. Technical drawings of construction works should
preferably be submitted in electronic format. The programme encourages partners to use digital signature. If it is not possible then signed documents of the application pack have to be scanned and uploaded to the eMS (in case of application form, the confirmation page of the application form must be either digitally signed or scanned, and uploaded to the eMS as attachment).

In case the project passes technical eligibility and loose quality check all scanned documents must be submitted on paper. The date and signature have to reflect the final changes in these documents. Detailed instructions on how to fill in the application form in the e-Monitoring system will be provided to the applicants.

Where the project activities include construction works or other works that fall under the regulation of the national building legislation, the supporting documentation has to be in line with the national building legislation. One copy of a full set of documents required under the national building laws, including building permit (‘ehitusluba/būvatļauja) must be submitted to the JS together with the application form. This set can be submitted in Estonian or Latvian. Concerning SO 2.3 ‘More integrated Valga-Valka central urban area’, the above mentioned set of documents, including building permit, must be submitted to the JS for assessment before MA final decision.

The documents submitted by the Estonian partners must comply with the requirements of the preliminary building design.

After the approval of the application by the MA, but before launching the procurement:

1) Estonian partners must submit documents that comply with the requirements of the principal building design (põhiprojekt) according to the requirements set forth in the Estonian building legislation.

2) Latvian partners must submit in cases, where the building design in a minimum composition and building permit was required:
   - Building design elaborated according to the requirements set forth in the Latvian building legislation and according to the conditions set by building authority (būvalde);
   - Updated building permit with a note from building authority on the fulfilment of building design conditions.

In other cases, the Latvian partners must submit before the start of construction works:
   - Updated certification card (apliecinājuma karte) or explanatory memorandum (paskaidrojuma raksts) with a note from building authority on the fulfilment of conditions for the actual start of the construction works.

The documents must be submitted via eMS.

The JS and construction experts will assess the compliance of the whole set of construction documents with the requirements of national building laws.

In addition, the applicant must submit together with the application form, or in case of SO 2.3 ‘More integrated Valga-Valka central urban area’ together with the set of construction documentation, a separate document “Justification of investments” in the following cases:

1) Cost of a single piece or a set of equipment in one location exceeds 50 000 euros under the budget line “Equipment”,

2) Construction costs per object/location exceed 50 000 euros under the budget line “Infrastructure and works”,

3) A total cost per object/location under the budget lines “Equipment” and “Infrastructure and works” exceeds 50 000 euros.

The “Justification of investments” document must include at least the following information:
1) Detailed description of the planned investment(s) and construction works, including price calculations. This information must be in line with the submitted building documentation.

2) Justification for the need for equipment/infrastructure and works including an explanation of the functionality and way of use. It must be explained how the equipment/infrastructure and works contributes to the achievement of the project objective(s) and output indicators.

3) Management and financial plan for the future (for a period of at least 5 years following project completion). Information on the following questions should be provided: Who will manage the investment(s) after their completion? What is the amount required for maintenance costs and what do these include? Which source will be used for covering the maintenance of the investment(s)?

The document “Justification of investments” can be compiled in English; or in Estonian or Latvian with a summary in English.

Projects that have been submitted under specific objective 1.2 and fulfil the output ‘Joint products and services developed in cooperation’, must submit an additional document with information about the jointly developed product based on questions listed in annex 5 to the programme manual.

6.2.2.1. Selection procedure of project applications

1) Technical eligibility and loose quality check

At first, applications are checked against the technical eligibility criteria.

Technical eligibility criteria:

1. Project application is developed based on the idea form submitted during call for ideas.

2. Project involves at least one Estonian and one Latvian partner, who are legally registered in the programme area and whose activities in the project are for the benefit of the programme area.\(^{28}\)

3. Lead partner is eligible (type, territory, officially registered by the application submission date of the given call).

4. Project partners are eligible (type, territory, officially registered by the application submission date of the given call).

5. Project partners are not bankrupt (there is no ongoing bankruptcy proceeding or no bankruptcy decision).

6. Project partners are not in liquidation or in compulsory dissolution.

7. Project partners have repaid any EU or national support to be refunded by the deadline. Latvian partners have submitted respective declaration to confirm that.\(^{29}\)

---

\(^{28}\) In duly justified cases, the monitoring committee may select for funding projects with Estonian or Latvian partners from outside the programme area in case their participation is necessary for the successful implementation of the project.

\(^{29}\) Information about Estonian partners is checked by the JS from relevant national registries.
8. The applicant or his legal representative has not been validly sentenced or penalized. Latvian partners have submitted respective declaration to confirm that.

9. Specific question for projects under specific objective 1.2 output ‘Joint products and services developed in cooperation’:
   - The project partnership involves at least one Estonian SME and one Latvian SME.

10. Specific question for projects under specific objective 2.2 output ‘Joint water or coastal areas management initiatives’:
    - The project partnership involves at least one Estonian and one Latvian partner listed in the footnote.

11. The planned activities help to fulfil the target value of at least one, or, in some cases two, output indicators depending on the requirements of the particular specific objective explained in chapter 3 of the programme manual.

12. Project budget is within the set financial limits.

13. Project duration is within the set limits.

14. All partners contribute to the project financially or in-kind according to the requirements of the programme and conditions of the given call for proposals.

15. Co-financing statements are submitted.

16. Co-financing rates have been observed and the sums indicated in worksheet “Partnership” of the application form and on co-financing statements match.

17. Specific question for projects under specific objective 2.1 and 2.2:
   - Total sum of costs under budget lines “Equipment” and “Infrastructure and works” are within allowed limits (an average 30 000 euros per site in one project.

---

31 Fraud (Estonian Penal Code § 209 Fraud and § 210 Benefit fraud, Latvian Criminal Law section 177); Provision of employment for alien staying in either Latvia or Estonia without legal basis (Estonian Penal Code § 260; Latvian Administrative Violations Code section 189 (prim), as well as the Criminal Law - section 280); Economic activities without activity license and prohibited economic activities (Estonian Penal Code § 372; Latvian Criminal Law sections 207 and 208); Violation of prohibition on business or prohibition to work in particular profession or position (Estonian Penal Code § 373; Latvian Criminal Law section 208 and section 296).

32 Information about Estonian partners is checked by the JS from relevant national registries.

33 Estonian institutions: Environmental Board of Hiiu-Lääne-Saare region; Environmental Board of Põlva, Valga, Võru region; Hiiu County Government; Lääne County Government; Ministry of Agriculture; Ministry of Economic Affairs and Communications; Ministry of the Environment; MTÜ Eesti Väikesadamate Arenduskeskus/Estonian Small Harbours’ Development Centre NGO; MTÜ Liivi Lahe Kalanduskogu/Association of Fisheries of Gulf of Liivi; Pärnu County Government; Police and Border Guard Board; Saare County Government.

Latvian institutions: Association of Latvia’s Coastal Local Authorities (member of LALRG); Kurzeme Planning Region; Latvian Environment, Geology and Meteorology Centre; Latvian Institute of Aquatic Ecology; Maritime Administration of Latvia; Ministry of Agriculture - field of fishery; Ministry of Environmental Protection and Regional Development; Riga Planning Region; State Border Guard; State Environmental Service.

In case of projects regarding Gauja/Koiva river basin, the partnership must include Vidzeme Planning Region, or municipality/municipalities of Vidzeme Planning Region from Gauja/Koiva river basin, or organisations founded by municipality/municipalities from Gauja/Koiva river basin in Vidzeme Planning Region. In case of projects regarding Salaca/Salatsi river basin, the partnership must include Vidzeme Planning Region or Riga Planning Region, or municipality/municipalities from Salaca/Salatsi river basin in Vidzeme Planning Region or Riga Planning Region, or organisations founded by municipality/municipalities from Salaca/Salatsi river basin in Vidzeme municipality.

34 In exceptional cases, when the monitoring committee finds it justified, it may select for funding projects with bigger budget than the set limits.

35 In exceptional cases, when the monitoring committee finds it justified, it may select for funding projects with longer duration than the set limits.
while the maximum amount per single site in the project may not exceed 50 000 euros).

18. Project activities are carried out in the eligible programme area (with exceptions allowed as described in the chapter 4.3.).

19. There is no duplication with current or completed projects.

20. Project is in line with the relevant EU and national legislation and policies and with the principles of sustainable development, equal opportunities and non-discrimination, and equality between men and women.

21. There are no error messages in the application form.

22. Latvian partners have submitted statements on de minimis aid36.

23. Construction documentation has been attached according to the requirements of the programme.

24. Document “Justification of investments” has been submitted according to the requirements of the programme.

25. The partners have no tax debts37 or if they do, they are in compliance with a schedule that is in place.

The JS will first check the existence of co-financing statements and documents “Justification of Investments” that must be attached to the application forms.

If the co-financing statements and/or document “Justification of Investments” are missing or if the co-financing statements are not signed, the applicant is given 3 working days to (re)submit these documents.

The JS will then continue checking the application against the other technical eligibility criteria and in parallel performs the loose quality check of the applications. The aim of the loose quality check is to minimize unclear issues related to the content of the application. In case the project activities fall under the regulation of the national building legislation, the JS will involve construction experts to check whether the application documents comply with the requirements of the national building legislation. If necessary, the JS will organise site visits to the project sites.

In case an application does not meet the technical eligibility criteria and/or includes unclear issues related to the content, the JS will send a request by email to the lead partner to complement the application. The email will be sent to the LP’s contact person on the email address provided in the application form. The level of detail of the questions related to the content of the application depends on the level of detail of the application.

The LP has to ensure the fulfilment of the technical criteria in 10 working days and submit an updated application to the JS.

After updating and re-submitting the application, the JS will finalise the technical eligibility and loose quality check. If a project still does not fulfil the technical eligibility criteria, the application will not pass on to the quality assessment. In that case, the MA will take an administrative decision to reject the project application.

36 Information about de minimis aid received by Estonian partners is checked from the national state aid and de minimis aid registry.

37 No tax debts based on information in Äriregister (Business Register) and Valsts ieņēmumu dienests (State Revenue Office)
2) Quality assessment of project applications

Projects that fulfil the technical eligibility criteria are subject to quality assessment.

Quality assessment is carried out by the JS with assistance from thematic experts, if necessary. The quality assessment is carried out by the JS following the 4-eye principle i.e. at least two members of the JS staff will assess each project application. The quality assessment, which is based on the quality criteria results in assessment sheets to be submitted to the monitoring committee for selection of projects. The quality check is usually completed within 3 weeks after the end of the technical eligibility and loose quality check. The concrete time period depends on the number of applications submitted in the given call for proposals.

The quality assessment of project applications includes assessment of 5 criteria. Each criterion gives a certain weight to the total scoring and the weights are indicated in the 1st column in the table below. For each criterion indicative questions are listed, which are used for assessment. Indicative questions are listed in the order of importance. Assessment result (total scoring of a project) is presented as a percentage.

The assessors use the following thresholds for grouping the projects:

1. Projects receiving total scoring at least 78% are recommended to be approved by assessors.
2. Projects receiving total scoring at least 73%, but less than 78% are recommended for discussion by assessors;
3. Projects receiving total scoring less than 73% are recommended not to be approved by assessors.

Each criterion must be given a score on a 5-point scale, where:

“5”: Excellent: the project fulfils the conditions of a given criterion on an excellent level and provided information is sufficient, clear and coherent for assessing the criterion;

“4”: Good: the project in general fulfils a given criterion and/or provided information includes certain shortcomings;

“3”: Satisfactory: the project only partly fulfils a given criterion and/or important aspects of the given criterion have not been explained in sufficient clarity or detail;

“2”: Weak: the project has serious shortcomings in fulfilling a given criterion and/or provided information is of low quality;

“1”: Unsatisfactory: the project does not fulfil a given criterion and/or information required is missing, making it impossible to assess the criterion.

Scoring of each criterion must be justified and explained.

In case a project receives “1” for any of the criterion, the project is automatically recommended not to be approved regardless of the total scoring.

<td>- Does the information asked additionally according to the annex 5 about the product or service planned to be jointly developed provide a clear and convincing evidence why this or these product(s) or service(s) are needed, how and why they are competitive and whether the project partners have the capacity to provide the product(s)/service(s)? (This question has the weight of approximately 50% of the assessment criterion “Objective, approach and activities”.)</td>
</tr>
</tbody>
</table>

| 3)  | Can the defined objective be achieved using the chosen approach (combination, interrelation and sequence of activities, including investments)? |

| 4)  | What is the quality of the planned project outputs in light of descriptions of output indicators in the programme manual? In case of projects under specific objective 2.1. also geographic coverage is assessed. |

| 5)  | Are the activities adequately planned and specified? Are the outputs defined, quantified and measurable? |

| 6)  | How logical and clear is the link between the planned activities and their influence to fulfilment of programme’s result indicator’s target value? |

| 7)  | How logical and clear is the link between planned activities and proposed outputs? |

| 8)  | Is the proposed time-schedule and intensity of activities sufficient and realistic? (Artificial extension and too tight project time schedule are avoided?) |

| 9)  | Are sufficient publicity measures planned to promote the project achievements during and after the project? |

| 10) | Are the planned coordination activities sufficient for successful project implementation? |

| 11) | The principles of sustainable development, equal opportunities and non-discrimination as well as equality between men and women are addressed in accordance with the nature of the project. |

| 12) | Additional questions under priority 2 “Clean and valued living environment”, specific objective 2.2: |
13) **Additional question under priority “Integrated labour market”:**

- Does the project clearly support equal opportunities and anti-discrimination?

### 10% Partnership and cooperation intensity

1) Are the partners relevant and necessary for implementing the described activities and none of the obvious partners are left out of the project partnership?

2) Is the cooperation inside partnership sufficient to the nature of the project?

3) Is the partnership formed in the best interest of achieving the project objectives?

4) Are the tasks and responsibilities clearly defined among the project partners?

5) Is the intensity of involvement of Estonian and Latvian partners in project activities balanced?

**NB!** The balance in number of partners between countries is not of primary importance.

6) Do partners have sufficient capacity to implement project activities?

### 20% Budget

1) Is the project budget proportionate to project’s contribution to fulfilment of programme output indicator(s)?

2) Is the project budget reasonable and cost efficient in comparison with the project objective and activities?

3) Are total budgets of Estonian and Latvian partners balanced?

4) Are the specifications in application form about ‘External Expertise and services’ and ‘Partners’ budgets’ sufficient and detailed enough?

5) Is there a clear relation between costs of work package 1 and the complexity of the project: number of partners, number of work packages, and intensity of project activities?

6) Is there a clear relation between the foreseen activities and budget under each reporting period?

### 15% Durability of project achievements

1) Explanations about financial and institutional durability of the project achievements are realistic and rational.

2) Are the project achievements sustainable?
6.2.2.2. Decision-Making

The Monitoring Committee carries out the strategic assessment of submitted project applications. It is based on the results of the quality assessment, the analysis of the existing portfolio of approved projects, the assessment of the achievement of target values of programme output indicators and the availability of funds under each priority. Thus, high scoring percentage of the quality assessment does not guarantee that the project will be selected for support.

Based on the strategic assessment, the MC selects projects for support from the programme funds. Based on the MC selection, the financing decisions are made by the MA. There are three options:

1) To approve the project application;
2) To approve the project application with certain conditions that must be fulfilled before the subsidy contract can be signed; or
3) To reject the project application.

The JS, on behalf of the MA, sends out financing decision to each lead partner within 10 working days after the monitoring committee meeting. In case the project was approved, the letter provides the total ERDF funding allocated by the programme, and if relevant, specific preconditions that must be fulfilled for decision to come into force. In case the project was rejected, the letter provides grounds on which the application failed.

Project partners, who find that their rights are violated by the decisions made by the programme authorities, may file a complaint as described in annex 4.

6.3. Contracting: partnership agreement and subsidy contract

If the MA approves your project and makes the financing decision without conditions, the lead partner must submit a partnership agreement signed by all project partners to the MA. It must be submitted within 1 month after receiving the approval letter from the JS.

If the MA approves your project with certain conditions, these must be fulfilled within 1 month after receiving the financing decision from the JS. If a reasoned request is provided, the MA may extend the time limit for fulfilling the conditions. The MA and MC, if necessary and guaranteeing that any MC member who has a conflict of interest is not involved in verifying the fulfilment of conditions, assisted by the JS, verify the fulfillment of the conditions. When the conditions are fulfilled, the JS sends respective letter to the LP. After receiving this letter, the LP has 1 month to submit the partnership agreement signed by all project partners to the MA.

Template for the partnership agreement and subsidy contract are available at www.estlat.eu.

The MA sends the subsidy contract to the LP within 1 month after receiving the signed partnership agreement. The LP has 1 month to sign and return the contract.
7. PROJECT IMPLEMENTATION

7.1. Start and end date of the project

The start and end date of the project will be fixed in the application form before signing the subsidy contract. During submission of the application only project’s total duration in months must be indicated.

The earliest date on which the activities can start and the expenditure can incur is the day after the selection of the project by the monitoring committee. Preparation costs, as described in section 5.4., are an exception to this rule. Please be aware that if your project is approved with certain conditions then making any expenditure before the MA verifies the fulfilment of the conditions is at your own risk.

The latest, a project has to start within 3 months after signing the subsidy contract. It is recommended to reserve up to 2 months in the end of the project for compiling reports. Other project activities should be finalised by that time.

7.2. Publicity requirements

As the programme is financed by the European Union all project partners have to follow the publicity requirements, and promote both the programme and the EU. The guidelines, that every project partner of the approved project has to follow, are published on the programme’s website at www.estlat.eu.

If these requirements are not followed or only partly followed, the related events, publications, etc. may become partly ineligible for ERDF co-financing.

7.3. Cost-sharing

Partners who plan to use cost-sharing have to sign a cost-sharing agreement. Otherwise, the cost-sharing is not eligible.

Shared costs are eligible only in case those are paid out from project partners’ accounts. A cost-sharing, where lead partner is withholding a certain amount of partners’ expenditure after receiving payment from the MA, is not eligible.

Cost-sharing agreement templates can be downloaded at www.estlat.eu.

7.4. Project Revenue

In case the project generates net revenue, project eligible costs will be reduced in the amount of net revenue. Procedure for deducting net revenue from the project eligible costs is set forth in annex 2.

7.5. Payments to the projects and use of euro

Payments to the projects are made on a reimbursement basis and no advance payments are available. Progress report, which is approved by the JS, serves as a basis for transferring the ERDF co-financing to the account of the lead partner by the MA.

Payments to the lead partners will be made in euro.

Expenditure incurred in a currency other than euro shall be converted into euro by project partners using the monthly accounting exchange rate of the European Commission in the month during which that expenditure was submitted for verification to the financial control body (for the reference please
It is the responsibility of the LP to distribute the funding among all the project partners after receiving the payment from the MA. It has to be decided among the partners, which partner(s) cover(s) the currency-exchange risks and costs related to the national transfer of funds within the project, as they are not eligible expenditure.

7.6. Accounting for expenditure and storing of documents

Lead partner and project partners must ensure that all accounting documentation related to the project is filed separately, and that all project related payments have a clearly distinguishable bookkeeping code. Project reports must be accounted in euros. The LP ensures that an adequate audit trail is documented on all levels of the project, including project partners’ expenditure.

The documents shall be kept either in the form of the originals, or certified true copies of the originals, or on commonly accepted data carriers including electronic versions of original documents or documents existing in electronic version only.

LP and project partners must ensure that all documents related to project costs and activities are safely and orderly kept at least 4 years after the final payment has been made by the MA to the LP. All the documents must be made available to the programme authorities, European Commission and the European Court of Auditors upon request.

When a project partner has received state aid, all documents related to project costs and activities must be safely and orderly kept for 10 years from the date on which the aid was granted. MA will inform all projects about the exact length of storing all the documents related to project costs and activities in the subsidy contract.

7.7. Budget surplus

If there will be surplus in the project budget, the programme will apply one of the following two options:

1) The surplus will be granted via call for proposals to new projects;

2) The surplus will be granted via call for proposals for the completed projects for implementing follow-up activities.

7.8. Budget reallocation, request for changes and prolongation

There is 10% of budget line flexibility at the total project level i.e. it is allowed to overspend budget lines up to 10% without submitting an official request for changes for budget re-allocations (10% budget flexibility rule). NB! A project’s total budget and the partners’ total budgets may not be exceeded.

In the following cases the decision on the submitted request for changes, budget re-allocation or prolongation is taken by the JS:

- Request includes changes in activities, which do not negatively affect the fulfilment of the target value(s) of the chosen programme output indicators.
- Budget re-allocation requests that exceed the 10% budget flexibility rule and do not negatively affect the achievement of the project objectives.
- Request to change the project start date.
- Request to prolong the project up to 6 months.
1. Request to change a partner’s total budget up to 30%. If the change relates to a budget decrease, the submission of a new co-financing statement is not required.

NB! Budget division between work packages is indicative, therefore it is not required to submit a request for changes for re-allocating finances between work packages.

In case of changes in the official name of the lead partner or other project partners, the LP or respective project partners must notify the JS by sending a signed letter.

In the following cases the decision on the request for changes or prolongation is taken by the monitoring committee:

- Request includes major changes in activities, which negatively affect the fulfilment of the target value(s) of the chosen programme output indicators.
- Request includes changes to the project objectives.
- Request includes changes in partnership of the project.
- Request includes adding, cancelling or having major changes in activities outside the programme area.
- Request to prolong the project for more than 6 months.
- Request to change a partner’s total budget more than 30%. If the change relates to a budget decrease, the submission of a new co-financing statement is not required.

The approved changes will be indicated in the project application form. The subsidy contract will be amended only in case of the changes in the main part of the contract.

The prolongation request has to be submitted to the JS the latest one month before the end date of the project.

All other requests can be submitted to the JS the latest before approval of the last progress report by the JS. Request for changes form is available on the website of the programme at www.estlat.eu.

7.9. Submission of partner and progress reports

Reporting has to be done in English, both on partner and project level. Supporting documentation, e.g. invoices, contracts, tender documentation may be in Estonian or Latvian.

Partner and progress reports must be submitted via eMS after every 4 months. The exact reporting deadlines depend on project starting date.

Detailed guidelines for reporting in eMS are available on the programme’s website at www.estlat.eu.

The description of reporting procedure and deadlines:

1) Each project partner (including lead partner) must submit a partner report with expenditure and activity description within 10 working days after the end of each reporting period. The report will be checked by Estonian or Latvian financial control bodies. In Estonia, the financial control is carried out by the Estonian Ministry of Finance, and in Latvia by the Ministry of Environmental Protection and Regional Development.

For example, if the project starts on 10 March 2017, the first report covers the period 10 March 2017 – 9 July 2017, and project partners have to submit partner reports to the financial control bodies within 10 working days after 9 July 2017.

Partner report must be submitted with all the supporting bookkeeping documents (e.g. receipts, invoices, bills, employment contracts, service contracts, lists of participants) and additional materials, e.g. examples of project outputs. The supporting documents must be provided electronically and
uploaded to the report. It has to be remembered that each project partner’s project related expenditure must be separated in the partner’s bookkeeping system.

The financial control body checks the partner report and provides its first set of questions and comments in 30 working days from the date of receiving the partner report.

If a partner has no costs to report, it must still submit a partner report. It is not possible to create new report until previous report is not submitted.

FC finalises its work by issuing a financial control (FC) Certificate to the report.

**NB!** If a partner exceeds in the partner report the total amount of any budget line of its budget, it must inform the LP. The LP will either accept or reject the overspending. The LP must inform the partner of its decision by sending a reply email with a copy to the Estonian or Latvian financial control body.

2) After receiving last confirmation of the partner reports, the LP has to submit the progress report of the whole project with supporting documents in 10 working days. The progress report will be checked by the Joint Secretariat.

The progress report must be submitted with additional materials, e.g. examples of project outputs.

3) JS checks the progress report. In case of questions and/or comments, the JS provides these to the LP by email in 10 working days after receiving the progress report. After confirming the progress report, the JS forwards it to the MA.

4) MA reviews the progress report and makes payment to the account of the LP. Usually it is made in 1 month after receiving the confirmed progress report from the JS.

5) LP makes payments to the accounts of the project partners.

The progress report consists of an activity report and financial report. The progress report serves as a basis for payments and is used for reporting on the programme’s progress to the monitoring committee and the European Commission.

The activity report includes information on the project’s progress towards the achievement of the project output indicators and project objective(s).

The financial report contains project related costs that were incurred during the current reporting period or during the previous reporting periods if they were left out from the previous reports. The report must contain information on both cash and in-kind expenditures. Costs not accounted for or not reported in due time are not reimbursed. The LP ensures that the expenditure stated in the financial report has not been included in a previously submitted financial report(s). The LP must ensure that at the total project budget level the total amounts of the budget lines do not exceed the amounts indicated in the application form, except where the budget flexibility rule allows it. Also, the total amount of each partner’s budget may not exceed the amount indicated in the approved application form.

There are the following programme specific rules for reporting:

1) Project partners can have more meetings between themselves than indicated in the application form, if the meetings are linked with the project activities and for the benefit of the project. **NB!** Please note that this exception does not apply to meetings outside the programme area. Project activities taking place outside the programme area must be specified in the approved application form (see points 5.1. and 5.3.3. of the programme manual). These meetings do not have to be explained or justified in the progress report.

2) Travelling in Estonia and Latvia outside the programme territory (costs related to budget line “Travel and accommodation costs”) is acceptable without further explanations in the following cases:
   a) Meeting project partners, who are located outside the programme area;
b) Meeting the programme institutions in Tallinn;
c) Transporting people and/or materials directly related to project;
d) Participating at the events organised by the programme.
e) Travelling in Estonia and Latvia outside the programme territory to events, which are not foreseen in the application form, but have a clear link with the activities of the project and are for the benefit of the project (e.g. thematic conferences and workshops), is in general acceptable. However, partners must consult the JS before such trips, to avoid problems during processing of partner and progress reports.

3) Changes in the number of planned purchases in the budget line „Equipment“: If the final number of purchases is different from the planned amount in the application form, it must be explained and justified. In case the difference is +/- 20% of the planned amount, usually it is enough to explain the case in the progress report. However, the partners must consult the JS before making the expenditure, to avoid problems during processing of partner and progress reports. If the difference is more than +/- 20% of the planned amount, it will be decided in cooperation between the LP and the JS, whether it is enough to explain the situation in the progress report or request for changes in the project should be prepared by the LP.

4) Number of participants: if the difference is more than 1/3 of planned number of participants (applies also to proportion of LV/EE participants, if indicated in AF), please justify the deviation. If it is less than 1/3, no need to explain deviations.

5) Publicity: if more press releases, articles etc. (which are not related to costs) are produced than planned, there is no need to provide the reasons. But in case of less publicity outputs are produced by the end of project/serious deviations are noticed during the project, please provide justification.

7.10. Pre-payments

Lead partner has a right to request pre-payment in amount of up to 50% of the total ERDF request of partner reports. This can be done after all the project partners have submitted partner reports to the FC bodies. The request cannot be submitted in the case of the first and last reporting period.

Please refer to annex 3 for the description of the pre-payment procedure and the application template.

7.11. Final report

Final report has to be submitted to the JS together with the last progress report. This report provides information about the achievement of the project objective and outputs as well as project’s results and impact. The lead partner also is requested to give general feedback from the project to the programme authorities.

Approval of the final report by the JS is a pre-condition for confirming the last progress report. A form of the final report will be published in the programme’s eMS, which is accessible via www.estlat.eu.

Failure to fulfil the planned project outputs may lead to reduction or repayment of subsidy payments.

7.12. Durability and ownership of project outputs

The ownership of the outputs having the character of investments in infrastructure and productive investments, produced during the project implementation must remain with the lead partner or project partners for at least five years from the final payment to the lead partner.
A project may have to repay the ERDF contribution if, within five years of the final payment to the LP, one of the following happens:

a) A cessation or relocation of a productive activity outside the programme area;

b) A change in ownership of an item of infrastructure, which gives to a firm or a public body an undue advantage;

c) A substantial change affecting its nature, objectives or implementation conditions, which would result in undermining its original objectives.

The LP must inform the JS of such changes beforehand so that the JS can assess the situation and needed actions.

The programme has reduced the time limit described above to three years in cases concerning the maintenance of investments made by SMEs.

7.13. Audit and other possible checks

In addition to the financial control, all projects funded by the EU Structural Funds are subject to audits performed by national auditing institutions. The amount of programme funds, which will be the subject to the second-level audit, will be defined by the Audit Authority.

Moreover, sample checks on projects’ accounts will be carried out at even intervals. The responsible auditing bodies of the EU and, within their responsibility, the auditing bodies of Estonia and Latvia are entitled to audit the proper use of funds on the project level.

All the partners involved in the project selected for controls must facilitate audit and control activities that might be performed at the initiative of the EU Member States, the European Commission or the programme management structures.

The lead partner is obliged to co-operate with the auditing bodies by providing all documents for the audit and giving access to its business premises. The lead partner and project partners have to retain for audit purposes all files, documents and data about the project at least four years after the final payment has been made by the MA to the lead partner.

7.14. Decommitment rule

The programme funds are subject to the decommitment rule. ERDF budget commitments at the programme level are made on a yearly basis. If this money or part of it is not spent by the end of the third year following the year of the commitment (n+3), it is withdrawn by the European Commission.

Regular reporting and timeliness of projects are therefore crucial factors in ensuring regular cash flow to the programme and to the projects, and avoiding loss of the EU funds. In case the programme has to commit funding, the projects, which are under-spending and/or have serious delays with reporting, might lose part of their approved project budget.

7.15. Irregularities

The definition of irregularity given in Article 1 of Council Regulation 2988/95 states:

“Irregularity shall mean any infringement of a provision of Community law resulting from an act or omission by an economic operator, which has, or would have, the effect of prejudicing the general budget of the Communities or budgets managed by them, either by reducing or losing revenue accruing from resources collected directly on behalf of the Communities, or by an unjustified item of expenditure.”
Examples of irregularities include:

- An incorrectly calculated payment claim received by the JS that is corrected before payment is made;
- Evidence indicating that items of ineligible expenditure have been included in the calculation of an ERDF grant previously claimed and paid;
- Evidence that a project has failed to implement the European Commission’s requirements on publicity or public procurement;
- Evidence that a project has failed to make progress in the delivery of the agreed outputs and/or results for which the ERDF grant was awarded;
- Evidence that the partnership has not set up adequate systems to control and monitor the project expenditure;
- Evidence of fraud.

Irregularities can be identified in several ways:

- By the lead partners;
- By financial control bodies or auditors;
- By national authorities;
- By the JS or MA on the basis of progress reports and payment claims.

In case of irregularities, MA is responsible for making the recovery decision in cooperation with JS and FC and notifying the LP, the JS, the FC and national responsible authorities of the decision. The amount of recovery is deducted from future payments, or the LP is obliged to reimburse the amount requested.
8. EU STRATEGY FOR THE BALTIC SEA REGION

The territory of the Estonia-Latvia Programme is part of the area that is covered by the European Union Strategy for the Baltic Sea Region (hereafter the EUSBSR or the Strategy). The need to solve common problems jointly in order to have a wider and more sustainable impact was the main impetus for elaborating the EUSBSR. The Strategy was approved by the European Commission in June 2009 following an update in 2012. For the implementation, an Action Plan has been compiled, which is updated in case of need.

The Strategy addresses the key challenges of the Baltic Sea Region like sustainable environment, prosperity, accessibility, safety and security. It has to reflect the Europe 2020 objectives of smart, sustainable and inclusive growth.

The EUSBSR has three overall objectives:

1. to save the sea;
2. to connect the region;
3. to increase prosperity.

As the Programme area is covered by the EUSBSR, in the implementation, the Strategy will be taken on board as relevant and as much as possible. As the Programme is of rather modest size and the impact of the majority of the projects is probably of quite local nature, the applicants do not have to describe any possible link to the EUSBSR in the project application and contribution to the EUSBSR will not give any extra points in the project assessment.

However, contribution to the EUSBSR gives the project broader visibility, may facilitate project beneficiaries to find new partners outside their country, which in turn may widen the scope of activities and increase the capacity of the organisation.

The procedure for establishing the contribution of the project into the EUSBSR is the following:

1. During the assessment of full project applications the JS together with the MA analyses whether the project may contribute to the EUSBSR according to the latest adopted Action Plan. As a result, an initial analysis will be compiled where a policy area or horizontal action will be identified and the reasons why the project can be labelled as contributing to the EUSBSR will be given.
2. This analysis will be submitted to the MC for making the decision on the projects proposed to be labelled as contributing to the EUSBSR. In case of disagreement by the MC, the issue will be solved by mutual discussion.
3. Following the MC decision, the list of projects together with the analysis will be submitted to the Policy Area Coordinator or Horizontal Action Coordinator along with the request to provide his/her opinion on the possible contribution of the project to the EUSBSR and how the project influences the development of a particular policy area.
4. In case all parties agree that the project will contribute to the EUSBSR, the project will be respectively notified and asked to include this information on the project web-site. The project may promote the Strategy and its contribution to it where relevant. It may also include this information into the project reports.

The criteria to be taken into account while assessing the contribution to the EUSBSR are the following:

1. The project should have an impact in the whole programme territory and possibly beyond it;
2. The project should create new development potential in the area in which it is implemented, with the possibility of using the results outside the programme area;
3. The project should support the achievement of objectives and sub-objectives as specified in the EUSBSR latest adopted Action Plan.
